Connect Four
with *Pushing!*

About the Game

Acacia is a fast, thinky, two-player abstract strategy game where owls and squirrels battle for cozy hollows in an old tree. Place your animals into the grid, building toward a line of four - but when your opponent gets too comfortable, push them out. Every shove is satisfying, every piece is precious, and one clever displacement can flip the entire game.

HOW TO PLAY

- 1 Players alternate placing pieces adjacent to other pieces.
- 2 You may eject one of your opponent's regular pieces with a "blocker" piece. Return the ejected piece to your opponent.

Features

- ▶ **Familiar with a Twist:** The core game is easy to grasp.
- ▶ **Table presence:** Stunning presentation
- ▶ **Strategic Depth:** There is no "solved" approach.
- ▶ **Replayability:** Lots of different approaches to try out.
- ▶ **Simple Rules:** Rules can be explained in 30 seconds. Think *Connect Four*, with two more rules and a lot more depth.

- 3 "Blocker" pieces can only be ejected with a neutral piece.

- 4 Connect Four pieces of your colour to win, OR be the first to place all your pieces.
