

You cannot run your farm alone.

1–5 players

Ages 10+

50–90 minutes

Welcome to the Neighbourhood

An engine builder where your neighbours are the engine. Every farmer specialises in one crop, so everyone needs everyone - and every neighbour who visits your farm leaves a crop behind for you to harvest.

Turns are a single quick action and every interaction leaves both sides better off. Nobody ever wrecks your farm; they pay to keep it busy. Feed the island best and the harvest is yours.

COMPONENTS

Already know the game? Skip this page. Every component is explained again where it is first used.

Component	Count	What it is
Crop cards	105	5 crop decks of 21 cards: Wheat, Apiary, Dairy, Orchard and Vegetable. Each crop's 21 is 3 starters (a Barn, a Farmstead and a Notice Board, each starter's back showing its own crop) plus an 18-card deck.
Island cards	13	Double-sided. The front has two spaces for island tokens; the back has a smiling farmer instead.
Island tokens	24	One for each crop and one wild, at 6, 5, 4 and 3 VP: 4 per crop and 4 wild. The back shows its crop, or wild. The 3 VP and 4 VP tokens show a Worker.
Notice Board markers	5	3D signposts, one per crop, marking each Notice Board.
Workers	15	Wooden figures, three of each of the five action colours: red, white, orange, yellow and green.
Player aids	8	4 Notice Board aids and 4 action summary aids. Each player takes one of each (see Setup).
Setup aid card	1	The island layout and the island tokens by player count.
Start Player card	1	Marks the first player (see Setup).

The Cards by Tier

Every crop deck is built the same way.

Kind	Per crop	Description
Starter	3	You start with these cards in your farm
Tier 1	5	The basic buildings of your farm
Tier 2	4	Buildings that work well with the basic buildings
Tier 3	3	Game-winning mega buildings
Tractor	3	They power your engine and give unique abilities
End-game	3	Helps you win

1

Loretta Orchard

First player, at random: takes the Start Player card. Play clockwise.

- 1 **Choose crops.** Each player chooses a different crop and takes that crop's 21 cards.
- 2 **The neutral deck.** Choose one other crop at random to play as well. At four players this is simply the fifth crop, so every deck is in play (3 / 4 / 5 / 5 decks at 2 / 3 / 4 / 5 players). At five players there is no neutral deck: every crop is played by a player.
- 3 Take out the neutral crop's three starters, which have a different card back, and return them to the box with every crop not in play. At two players, keep the unused crops' Notice Boards out for step 6.

SETUP (CONTINUED)

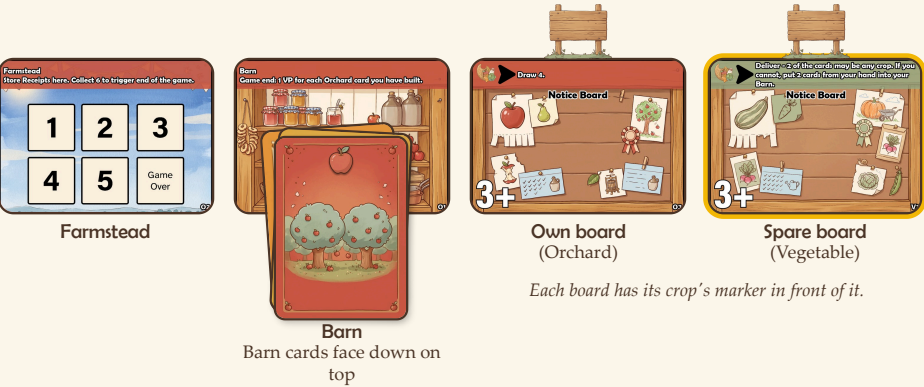

- 4 **Lay out your farm.** Place your crop's three starters (Farmstead, Barn and Notice Board) face up in a row in front of you. Leave space below every card for the cards that will go there.
 - **Farmstead** - This has 6 slots to hold receipts from deliveries. When a person fills all their slots, the end game is triggered (see later)
 - **Notice Board** - This is where other players may visit you. You may never use your own Notice Board (see Notice Boards later)
 - **Barn** - where you store Harvested crops, ready to be delivered (see Harvest and Delivery later)
- 5 **Player aids.** Take one of each: a Notice Board aid, listing the five Notice Board powers, and an action summary aid, listing the five actions.
- 6 **Two-player setup** - each player will have 2 Notice Board cards - the one from their starter deck, plus an additional Notice Board from a crop that is not being played. Shuffle the Notice Boards of the crops nobody is farming face down and deal 1 at random to each player. Add it to your farm beside your own Notice Board. The third goes back in the box.
- 7 **Notice Board markers.** Take the marker of each Notice Board in your farm (matched by colour) and stand it in front of that board, so everyone can see which cards are Notice Boards. Return the unused markers to the box.
- 8 **Deal your hand.** Shuffle your crop's 18 deck cards. Take 4 into your hand.
- 9 **The decks.** Shuffle the neutral deck. Put every deck in play face down in the middle of the table, kept separate, with room beside each for its own face-up discard pile. Crops are never shuffled together.

SETUP (CONTINUED)

Example: A two-player farm

▲ CENTRE OF THE TABLE ▲ *Charlie may visit either board, one visit per turn*

- 10 **Build the island.** Lay out the island cards for your player count in three rows (the rows are artwork only; every island card works the same way). Lay each row so its cards straddle the row beneath. Unused island cards go back in the box.

Players	Bottom row	Middle row	Top row	Island cards	Tokens	Wild tokens	Workers
2	A1, A2, A5	B1, B4	D1	6	12	0	6
3	A1, A2, A3, A5	B1, B2, B4	C1, C3	9	18	2	8 to 10
4	A1, A2, A3, A4, A5	B1, B2, B3, B4	C1, C2, C3	12	24	4	12
5	A1, A2, A3, A4, A5	B1, B2, B3, B4	C1, C2, C3	12	24	4	12

- 11 **Island tokens.** Sort the island tokens by their backs. Take the 4 tokens of each crop in play. At three players, also take 2 of the 4 wild tokens, chosen at random without looking; at four or five players take all 4 wild tokens; at two players take none. Return the rest to the box. Mix the tokens face down and place 2 face up on every island card, covering its two “2 any” spaces. An island card may hold two tokens of the same crop.

SETUP (CONTINUED)

- 12 Workers.** Mix the 15 Workers together in the middle of the table. For every token that shows a Worker (the 3 VP and 4 VP tokens), take one without looking and stand it on that token. The Workers left over go back in the box.
- 13 First player.** Choose the first player at random. The first player takes the Start Player card and keeps it in front of them for the whole game, as the reminder of who started: the last round ends after the player on their right (see End of the Game). Play passes clockwise.

CARDS AND CROPS

The Four Lives of a Card

A card does a different job depending on where it is.

Where it is	What it is
Face up in your farm (built)	A card you have built. It is now one of your buildings (or a Tractor or End-game card), and its text works for you from here on.
On a building (face down)	The crop is growing. Cards go face down onto a building's stack, and the stack grows until it reaches the building's threshold: then the crop is ripe and ready to harvest.
In your Barn (public)	Harvested and ready to ship. Barn cards pay for island deliveries.
In your hand (hidden)	Ripe with possibilities: a building you may build, a card you may spend to pay a cost, a card you may pay onto your own building to GROW it, or the card you place on a neighbour's Notice Board when you visit.

CARDS AND CROPS (CONTINUED)

Reading a Card

Every card belongs to one crop, shown by its colour and its crop badge.

- 1 **Crop badge** - which crop this card is, matching its colour.
- 2 **Build cost** - 2 wheat + 1 of any crop, one icon per card. The hammer marks a building.
- 3 **Activation cost** - the crop you pay onto this building to **GROW** it.
- 4 **Ability** - fires when activated.
- 5 **Threshold** - full at 2 cards.
- 6 **Victory points** - scored at game end.
- 7 **Name** - card names are flavour.

- **Crop and cornucopia icons.** A crop icon, in the build cost or as the activation cost, must be paid with a card of that crop; a cornucopia (wild) icon may be paid with a card of any crop. **You pay these costs with cards from your hand**, unless a card says otherwise.
- **When activated** normally means when its owner grows it.
- **When Harvested:** fires when its owner harvests it.
- **A deck card** is the top card of a deck in play, the deck your choice. Nobody ever looks through a deck.
- **The kind of card** - the symbol at the top of the cost column, above the cost icons: the build symbol (a building), the Tractor symbol, the End-game symbol, or the starter mark.

Tractor and End-game cards

They print no VP, have no threshold and never hold cards. For convenience, they can be tucked under your Farmstead, so only the text is visible. A Tractor card's text works for as long as it is in your farm; an End-game card scores at game end, as it says.

CARDS AND CROPS (CONTINUED)

The Five Crops

Every crop has one colour, and it is also the colour of that crop's action. A red card is an Orchard card, and red is the colour of Draw, which is what Orchard does.

- On cards, card backs and Notice Boards the colour tells you the crop.
- On Workers and the player aids the same colour tells you the action.

Crop	Colour	Worker	Plain action	Notice Board power
 Orchard	 red		Draw	<i>If you have 2 or fewer cards in hand, Draw 4.</i>
 Dairy	 white		Build	<i>Build, spending cards of any crops with a discount of 1.</i>
 Apiary	 orange		Grow	<i>Grow a building using the top card of any deck.</i>
 Wheat	 yellow		Harvest	<i>Harvest one of your buildings, even if it is 1 card short of full.</i>
 Vegetable	 green		Deliver	<i>Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.</i>

YOUR TURN

The Turn in Three Steps

- 1 **Visit** (*optional, first*): play 1 card from your hand onto a neighbour's Notice Board and perform its power (see The Visit).
- 2 **Take 1 action** (*required*): Draw, Build, Grow, Harvest or Deliver (see The Five Actions).
- 3 **Worker** (*optional, before or after your action*): discard 1 Worker to take the plain action of its colour (see Workers).

- You cannot visit after your action: the power you buy can set up your action.
- You must take an action if you can. If none is possible, pass it (you may still use a Worker).
- Finish resolving each step, including everything its abilities trigger, before starting the next.
- **There is no hand limit.**

The Visit

- 1 Choose a Notice Board in a neighbour's farm whose power you can use right now.
- 2 Place **1 card from your hand**, face up, on that board's stack. Any card of any crop may pay. If you do not have a card in hand, you may not visit.
- 3 Take that board's power immediately.
- 4 The card stays on that board until its owner harvests the board. When they do, it goes into their Barn.

IMPORTANT

You may never visit your own Notice Board (either of them at two players). Everything a Notice Board earns you, it earns from other people.

- **You may not visit a board whose power you could not carry out at all right now.** If you could carry out part of it, you may visit and do as much as you can. The card you pin has already left your hand, so it cannot be used for the power.

YOUR TURN (CONTINUED)

- Visiting takes nothing from the board's owner: they do not act, and they do not have to agree.

The Notice Board Powers

Board	Its power, and how it works
 O₃ Orchard	<i>If you have 2 or fewer cards in hand, Draw 4.</i> Draw 4 cards, one at a time, each from any deck in play.
 D₃ Dairy	<i>Build, spending cards of any crops with a discount of 1.</i> Build a card from your hand. It costs 1 card fewer than printed, and you may pay the rest with cards of any crops, whatever its icons ask for. A Tractor or End-game card costs you 1 card of any crop.
 A₃ Apiary	<i>Grow a building using the top card of any deck.</i> Choose one of your buildings that is not full and has an activation cost. Take the top card of any deck in play and put it on that building's stack as its activation payment, whatever its crop. Resolve the ability.
 W₃ Wheat	<i>Harvest one of your buildings, even if it is 1 card short of full.</i> Harvest one of your own buildings exactly as the Harvest action, except that it may be 1 card short of its threshold instead of full: a building of threshold 3 holding 2, or of threshold 2 holding 1. A Notice Board of yours is 1 card short when it holds 2, so this power takes a board at 2. It is the only power that ever reaches a Notice Board below 3.
 V₃ Vegetable	<i>Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.</i> If you can make a delivery to the island, you must. Up to 2 of the 4 cards you pay may be of any crop, in place of cards a token asks for. Only if you cannot make any delivery, even with that help, put 2 other cards from your hand into your Barn (the card you pinned has already left your hand): as many as you can, up to 2.

YOUR TURN (CONTINUED)

Example: One visit, two ways

A round later, on Jean's turn. Loretta has harvested her O3; Charlie's W3 holds 3 cards.

Before
Jean's turn
placeholder art

1 Jean's hand (4)

Jean's Barn (1)

D4 The Milking Shed
2 of 2: full

D8 The Abundant Shed
1 of 2: not full

Jean farms Dairy. His own D3 Notice Board is never a choice, and he may visit only one board a turn.

2 Way 1: onto Loretta's O3 Orchard Notice Board

Hand 4 - 1 + 4 = 7

Jean's Barn: 1, unchanged

O3 Notice Board
If you have 2 or fewer cards in hand, Draw 4.

0 → 1 card

5 Loretta harvests O3 later, so the orchard card goes into Loretta's Barn.

3 Way 2: onto Charlie's W3 Wheat Notice Board

Hand 4 - 1 = 3

Barn 1 + 1 = 2

W3 Notice Board
Harvest one of your buildings, even if it is 1 card short of full.

3 → 4

D8 → Barn D4 stays full

5 Charlie harvests W3 later, so the orchard card goes into Charlie's Barn.

- 1 The same card. Jean pins his orchard card, the one he has no use for. What it buys depends on whose board it goes on.
- 2 Way 1, Loretta's O3 (0 → 1 card): Draw 4, from any decks in play. Hand 4 - 1 + 4 = 7; his Barn stays at 1.
- 3 Way 2, Charlie's W3 (3 → 4 cards): Jean has two targets. D4 is full (2 of 2); D8 holds 1 of its 2 cards, so it is 1 card short. He takes D8: its 1 dairy card goes into his Barn, and D8 is empty and ready to grow again.
- 4 Hand 4 - 1 = 3 (2 dairy, 1 wheat); Barn 1 + 1 = 2 (1 wheat, 1 dairy). D4 is still full. Because the Visit comes first, Jean can now take Harvest as his action on D4: its 2 dairy cards go into his Barn as well. Barn 4 (1 wheat, 3 dairy), enough for a second delivery next turn on an island card whose last token is dairy.
- 5 Either way, the card stays on that neighbour's Notice Board. When Loretta (or Charlie) harvests that board, the orchard card goes into their Barn, never Jean's.
- 6 Not allowed: using Charlie's Wheat power on a building 2 or more cards short of full, visiting his own D3, or visiting both Loretta's and Charlie's boards in one turn.

The Five Actions

Draw

Build

Grow

Harvest

Deliver

On your turn you take exactly one of these five actions. Each is described below.

1. Draw

Draw 2 cards. Draw them one at a time; each may come from any deck in play, the same deck or two different decks. You may draw from any deck in play, including the neutral deck and your neighbours' decks.

2. Build

Choose a card in your hand and put it into your farm, paying its build cost with other cards from your hand. A crop icon needs a card of that crop; a cornucopia icon takes any crop. Spent cards go to their own crops' discard piles.

- You may build a card of any crop, not only your own.
- A new building arrives with an empty stack.
- Build at a discount of N** (W7, D4, D9, D10 and the Dairy Notice Board): pay N fewer cards than the printed cost, and pay the rest with cards of any crops. A cost cannot go below 0.

YOUR TURN (CONTINUED)

3. Grow

Activate one of your own buildings that is not full. A building is “full” when the number of cards on the building equals (or exceeds in special cases) the threshold number printed in the corner.

- Pay 1 card from your hand that matches its activation cost (any crop, if the cost is a cornucopia) onto its stack. Then resolve its ability.
- **A full building cannot be grown** until its owner harvests it.
- You can never grow a Notice Board, a Barn, a Farmstead, a Tractor card or an End-game card.

INFINITE LOOPS

A card may only be grown once per turn. If a card has already been grown, you cannot grow it again. If for any reason, you trigger an infinite loop, you immediately lose the game. *Farmers don't tolerate such nonsense.*

4. Harvest

Choose one of your own full buildings, or one of your Notice Boards holding 3 or more cards, and move its whole stack into your Barn.

- The building stays in your farm, empty and ready to take cards again.
- Harvesting scores no points by itself. The cards are the prize.
- A building that is not full cannot be harvested, however many cards it holds, unless a card's own text says so. The cards that print their own exception are **W8**, **W11**, **W12** and **W13**, and so does the **Wheat Notice Board power**. A Notice Board is only ever reached below 3 by that power (at 2 cards) or by **W11**.
- Some cards move single cards from a building into your Barn (**A11**). That is not a harvest.

YOUR TURN (CONTINUED)

5. Deliver

Make one delivery to the island.

1 Choose any island card that still has a token. The token indicates the crop that it demands. A wild token, shown with the cornucopia icon, demands any 2 cards. Any island card is legal on any turn - they do not have to be delivered in any order.

2 Pay **exactly 4 cards from your Barn**:

- **First delivery** (both tokens still there): 2 cards for each token's demand. If both tokens show the same crop, that is 4 cards of that crop.
- **Second delivery** (one token left): 2 cards for that token's demand, **plus 2 cards of any crops** for the "2 any" the first token uncovered.

3 Paid cards go to their own crops' discard piles.

Delivery	You pay	Cards
First	both tokens' demands	4
Second	the last token's demand + 2 any	4

BARN ONLY

You can never deliver from your hand. Every card you deliver was harvested first - from your own buildings, or from the cards your neighbours pinned to your board.

Taking your receipt

- **First delivery**: choose **either** token and take it. The other stays for the next deliverer.
- **Second delivery**: take the last token. The island card is finished. Turn the card over, to indicate no further deliveries are possible.
- If a Worker stands on your token, **take the Worker too** (see Workers).

The token is your **receipt**. Put it face up in an empty slot of your Farmstead. When you place your sixth, the end is triggered (see End of the Game). A card that gives you two receipts from one delivery (V14) fills two slots, and both count.

Receipts keep their crop. A wild token is a wild receipt. Some cards score receipts by crop (W21, V19, V21).

YOUR TURN (CONTINUED)

General Note: Buildings

- **Only the owner activates their building.** Notice Boards are never activated by their owner.
- **Full and clogged.** When a building's stack reaches its threshold it is full. A full building:
 - takes no more cards, from anyone, by any route;
 - cannot be grown, so its "when activated" ability cannot fire. Its **When Harvested:** line still happens when you harvest it;
 - stays that way until its owner harvests it, or a card moves cards off it.
- **Cards land on a building in three ways:** a **GROW** (your building, matching card, you take the ability), a **SOW** (a card effect, any card, nothing fires), or a **VISIT** (a neighbour's Notice Board, any card, you take its power).
- **Notice Boards never clog** (see The Notice Board).

CHEAP AND PATIENT, OR DEAR AND HUNGRY

Cheap buildings have high thresholds and soak up cards for a long time before they clog. Expensive buildings have low thresholds: they fire at once, but you will be harvesting them constantly.

Example: A typical turn

3 players: Loretta farms Orchard, Charlie Wheat, Jean Dairy. Neutral deck: Vegetable.

Cards: placeholder art	Before Charlie's turn	1 Visit: Loretta's O3	2 Action: Grow W4	3 Worker: Harvest
O3 Notice Board 3+ If you have 2 or fewer cards in hand, Draw 4. Loretta's farm	 = 2	 = 3	 = 3	 = 3
Charlie's hand W4 Wheat Field 2 Draw 1. When Harvested: Put 1 card from your hand into your Barn.	    = 4	       = 7	        = 7	      = 6
Charlie's Barn	 = 1	 = 1	 = 1	     = 4
Charlie's Workers	 yellow: Harvest	 yellow: Harvest	 yellow: Harvest	 → to the box = 0

1 Visit: Charlie pins his vegetable card to Loretta's O3 Notice Board (2 → 3 cards) and takes its power, *Draw 4:* from the Wheat, Wheat, Dairy and Orchard decks. Hand 4 - 1 + 4 = 7.
2 Action: Grow: Charlie pays 1 wheat card onto W4 Wheat Field: 2 of 2, so it is full. Its ability still fires: *Draw 1:* from the Vegetable deck. Hand 7 - 1 + 1 = 7.
3 Worker: Harvest: Charlie discards his yellow Worker to the box and harvests W4: both wheat cards go into his Barn. W4's When Harvested: line puts his vegetable card from his hand into his Barn.
4 Result: Hand 6; Barn 1 + 2 + 1 = 4 (1 orchard, 2 wheat, 1 vegetable); W4 is empty, ready to grow again. Charlie ends his turn with 6 cards in hand and 4 in his Barn: 10 cards, up from 5.

YOUR TURN (CONTINUED)

Example: Two deliveries

The same two-player game as the setup example.

1 Earlier: Charlie's first delivery

Charlie takes

B1 keeps: wheat 5 VP + one 2 any

2 Before Loretta's turn

Loretta's Barn (6)

Farmstead: 3 of 6

3 Loretta's choice

A1: first delivery 2 wheat + 2 orchard

B1: second delivery 2 wheat + any 2

Either way her 2 wheat go. She chooses A1 and takes the wheat 6 VP.

4 Pay

To discard

Barn $6 - 4 = 2$

5 Take the token

Loretta's Farmstead

4 of 6 slots filled.

6 End check

4 receipts, not 6: the game goes on.

What next? Charlie needs a pair of wheat and any 2 cards to finish island B1. Whoever finishes island A1 needs 2 orchard and any 2 cards, and takes the green Worker with the 3 VP.

- 1 Earlier, Charlie paid island B1's wheat and apiary demands and chose the apiary 3 VP token, taking the yellow Worker. B1 keeps its wheat 5 VP token and shows one 2 any.
- 2 Before Loretta's turn her Barn holds 6 cards (2 wheat, 1 apiary, 3 orchard) and her Farmstead 3 receipts.
- 3 Loretta's choice. Island A1 is a first delivery (2 wheat + 2 orchard, choose wheat 6 or orchard 3 + Worker); island B1 is a second delivery (2 wheat + any 2). She chooses A1 for the wheat 6 VP.
- 4 Pay. 2 wheat + 2 orchard go to their discard piles. Barn $6 - 4 = 2$ (1 apiary, 1 orchard).
- 5 Take the token. The wheat 6 VP receipt goes in her Farmstead: 4 of 6. Island A1 now shows the orchard 3 VP token and one 2 any.
- 6 End check. 4 receipts, not 6, so the game goes on.

FIRST OR SECOND?

The first delivery pays for two demands and picks the better token. The second is easier to pay, since half of it is any crop, but takes what is left. A Worker on the lower token can make it the better one.

Workers

Workers are the wooden figures on the island, one standing on every 3 VP and 4 VP token at the start of the game.

Each Worker gives the plain action of its colour: red Draw, white Build, orange Grow, yellow Harvest, green Deliver (see The Five Crops).

- **Using Workers:** before or after your action, you may discard 1 Worker to take the plain action of its colour. It then leaves the game (return it to the box).
- **One per turn.** It is always the plain action, never a Notice Board power.
- You may not use a Worker whose action you cannot take.
- You may use a Worker on a turn where you had to pass your action.
- A Worker's Grow places its card as normal and can fill the building.
- A green Worker's Deliver is an island delivery, paid in full from your Barn.
- Workers you hold are public. Unused Workers score nothing.

END OF THE GAME

The End

- **The end is triggered the moment a player places their sixth receipt** in their Farmstead.
- **Finish the current round**, so that every player has had the same number of turns: play continues until the player sitting to the right of the first player (the player with the Start Player card) has taken their turn. Then the game ends. If that player triggered it, the game ends at the end of their turn.
- The triggering player finishes their whole turn, including their Worker.
- A receipt beyond the sixth (for example from V14) is placed beside the Farmstead and scores; the end is triggered as normal.

Scoring

Add up three things, all on the table in front of you:

- 1 **Receipts:** the VP printed on your receipt tokens (3 to 6 each).
- 2 **Printed VP** on every card you have built: every card in your farm except your starters. Tractor and End-game cards print none.
- 3 **End-game scoring:** each End-game card you have built, scored as it says, **and your Barn's end of game scoring** - 1 VP for each card of your own crop that you built, including Tractor and End-game cards.

Workers score nothing. Cards in your hand and Barn score nothing unless a card says so.

TIE-BREAK

The tied player with the most cards in hand and Barn combined wins. If still tied, they share the victory.

END OF THE GAME (CONTINUED)

Example: Scoring Loretta's farm

Loretta (Orchard) placed her sixth receipt; the round finished, and the game is scored.

O2 Farmstead (1) **O1 Barn** (4) **O3** (3*) **V3** (3*)

Game end: 1 VP for each Orchard card you have built.
Starters: never built, 0 VP

Built cards (7) (2) **Cards: placeholder art**

The Apple Grove (Tier 1, O4)
The Cherry Grove (Tier 1, O6)
The Heritage Grove (Tier 1, O8)
The Fruit Stand (Tier 2, O9)
The Bakehouse (Tier 2, W11)
The Fruit Store (Tractor, no VP, O16)
Crop Diversity (End-game, no VP, O20)

5 1 Worker score nothing

Source	Working	VP
1 Receipts	6 + 5 + 4 + 3 + 6 + 5	29
2 Printed VP on built cards	1 + 1 + 1 + 2 + 2	7
3 O2o Crop Diversity	2VP buildings (O9, W11) × 2 VP	4
4 O1 Barn scorer	Orchard cards built: O4, O6, O8, O9, O16, O20	6
5 Worker	score nothing	0
Total	29 + 7 + 4 + 6	46

- Receipts: the VP printed on each of Loretta's six receipts.
- Printed VP: every card she built scores its wreath; Tractor and End-game cards print none. Starters (O1, O2, O3, V3) are never built: 0.
- O2o Crop Diversity (Game end: 2 VP for each 2VP building you have built): O9 and W11 print 2 VP, so $2 \times 2 = 4$.
- O1 Barn: 1 VP for each Orchard card she built: O4, O6, O8, O9, O16 and O20. W11 is a Wheat card, so it does not count.
- Workers score nothing. For a tie, see Tie-break.

CORE CONCEPTS

Cards that break the rules

If the rulebook and a card contradict each other, the card's power takes precedence. For example, the rulebook says all Deliveries must come from your Barn. But, there are some cards which let you deliver from your hand.

Open information

Your hand is hidden. Everything else is public: your farm, your Barn, your Workers, your receipts. You may never look through a discard pile to see which cards are in it, or look at the cards face down in your Barn.

Neighbours

A **neighbour** is any other player at the table, not only the players sitting beside you.

Cards you have built

"Cards you have built" means every card in your farm except your starters, including Tractor and End-game cards. So your Barn counts every Tier 1, Tier 2, Tier 3, Tractor and End-game card of its crop that you have built. The same meaning applies to any card that says "for each X you have built".

The Keywords

- GROW** - place a card from your hand on one of your buildings, matching its activation crop, and perform its ability.
- SOW** - place any card on a building, but do not perform its ability.

CORE CONCEPTS (CONTINUED)

- **VISIT** - place a card from your hand on a neighbour's Notice Board and take its power.

YOUR FARM

Every player starts with three cards already in play: the Farmstead, the Barn and the Notice Board. **Starters are never built:** they score no VP and never count as “a card you have built”.

The Farmstead

Holds your receipts in six printed slots. It reads: *“Store Receipts here. Collect 6 to trigger end of the game.”* It has no ability, no stack and no threshold, and it is never a target of a card ability.

When you place your sixth receipt, your Farmstead is full and the end of the game is triggered (see End of the Game).

Keep your receipts face up: each shows its crop (or wild) and its VP, and some cards count receipts by crop.

The Barn

Your Barn cards sit on top of it, face down and turned portrait, so their backs show their crops. There is no limit to how many cards your Barn may hold. It prints your own-crop scorer: for example, the Orchard Barn reads *“Game end: 1 VP for each Orchard card you have built.”*

The cards in your Barn sit on top of the Barn card, face down, waiting for the island. The backs show every card's crop, so your Barn is public.

The Notice Board

Prints your crop's power (see The Notice Board Powers) and the threshold 3+. It is the only card a neighbour may visit. It is a building for harvesting and for nothing else:

- It has no activation cost. Nobody ever grows it or sows onto it.
- Cards arrive on it only by a visit, and leave it only when its owner harvests it.
- **You never use your own Notice Board's power.**
- Card text that counts “your buildings” counts your Notice Board(s): for example A21 The Wax Hall. A card that triggers when you place a card fires when you place a visit card: for example A16 The Beekeeper's Veil.

YOUR FARM (CONTINUED)

THE BOARD NEVER CLOSES

A Notice Board takes any number of cards. The **3+** on it is the least its owner needs before harvesting it, never a limit. It never becomes full and never refuses a visit. Two things reach a board below 3 and nothing else does: the **Wheat Notice Board power**, which takes a board holding 2, and **W11 The Bakehouse**, which takes one however many cards are on it.

SMALL RULINGS

- **“Whenever” abilities fire every time.** A “whenever” ability fires each time its trigger happens, even several times in one turn. Each building built or harvested, and each card placed, is its own trigger: an action that builds 2 buildings triggers “Whenever you Build” twice. For example, D16 The Ledger draws once for each building you build, and W16 The Granary draws once for each building you harvest, as long as you still hold 5 or fewer cards each time it looks.
- **Empty decks.** When you must draw from a crop's deck and it is empty, shuffle that crop's discard pile to make its new deck. If both are empty, you cannot draw from that crop; if the effect lets you choose a deck, choose another deck in play.
- **Discards.** Cards spent, paid or discarded always go face up to their own crop's discard pile, whatever farm they came from.
- **Drawing only from decks in play.** “Any deck” always means any deck in play. “Draw 2” and every “Draw N” draws one card at a time, each from any deck in play.
- **“You may”** in an ability is optional. An ability without it is not. If an ability cannot be carried out in full, carry out as much of it as you can, **except V6 The Trade Depot, which is all or nothing.**
- **A card sown onto a neighbour's building is not a visit.** It buys nothing and pays nobody.
- **A card taken off a stack by a card effect is not harvested,** so harvest abilities do not fire.
- **Built** means paid for and put into your farm (see Your Farm). A demolished card stops counting as built.
- **Buildings in card text.** “Your buildings” are the cards in your farm that have a threshold, including your Notice Board(s); never a Tractor card, End-game card, Barn or Farmstead. **SOW** and **GROW** never reach a Notice Board. A Notice Board is harvested only when it holds 3 or more cards, with two exceptions: the **Wheat Notice Board power** takes one holding 2, and **W11 The Bakehouse** takes one however many cards are on it.

QUICK REFERENCE

Your turn

1 Visit (optional): 1 hand card onto a neighbour's Notice Board; take its power now.

2 1 Action: Draw, Build, Grow, Harvest or Deliver.

3 Worker (optional): discard 1 for its colour's plain action. One per turn. Red Draw, white Build, orange Grow, yellow Harvest, green Deliver.

A building may be activated at most once per turn; "whenever" abilities fire every time.

Actions

- **Draw** - 2 cards, one at a time, from any decks in play.
- **Build** - put a hand card into your farm; pay its cost icons from your hand.
- **Grow** - pay 1 matching card onto your building that is not full; take its ability.
- **Harvest** - move a full building's stack, or a Notice Board's 3+ stack, into your Barn. W8, W11, W12, W13 and the Wheat board power print their own exceptions.
- **Deliver** - pay 4 Barn cards to an island card; take a token.

The Visit

- Never your own board. One visit per turn.
- Only a board whose power you can use now, at least in part. Do as much as you can.
- The card stays; its owner harvests it.

Notice Board powers

-  **Orchard** (Draw): If you have 2 or fewer cards in hand, Draw 4.
-  **Dairy** (Build): Build, spending cards of any crops with a discount of 1.

-  **Apiary** (Grow): Grow a building using the top card of any deck.
-  **Wheat** (Harvest): Harvest one of your buildings, even if it is 1 card short of full. (A Notice Board is 1 card short at 2: the only power that reaches one below 3.)
-  **Vegetable** (Deliver): Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.

The island

- Any island card with a token left. Always 4 cards from your Barn.
- **First delivery:** both tokens' demands (2 of a crop each; a wild token: any 2). Choose a token.
- **Second delivery:** the last token's demand + any 2 cards. Take the last token.
- Take the Worker on your token. Receipts keep their crop.
- No substitutes (except the Vegetable board's 2 any-crop cards).

Workers

- Before or after your action, discard 1 for its colour's plain action. One per turn.
- Red Draw, white Build, orange Grow, yellow Harvest, green Deliver.

Barn cards

- Only deliveries and card effects take cards out of your Barn.
- A card discarded from a Barn is not a delivery; a delivery is not a discard.

End and scoring

- Sixth receipt: finish the round (it ends with the player to the right of the first player), then score. Extra receipts score.
- Receipts (3 to 6 each) + printed VP + End-game cards (and your Barn).
