About the Game

An engine builder where your rivals are the engine. Every farmer grows just one crop, so everyone needs everyone - and every visit to your farm puts coins in your pocket.

Build the farm the island can't live without, and race your harvests to the island's peak.

Features

Interaction that pays - rivals hand you coins every time they use your farm.

Five asymmetric crop engines - your farm plays nothing like your neighbour's.

The island is the game clock - every delivery visibly climbs toward the end.

Solo to four players in one small box - 105 cards do all the work.

Doing the Rounds

GROW YOUR FARM

Plant cards on your buildings and harvest them into your barn - every crop has its own rhythm.

HIRE HANDS

Add hired hands to your farm - skills your neighbours can't grow themselves.

GET PAID BY RIVALS

Every time a neighbour uses your farm, they pay you. Being needed is the engine.

FEED THE ISLAND

Deliver harvests up the island. Reach the peak first and the game ends - with you ahead.

Components

105 cards · 5 meeples · 30 cardboard tokens · small box
