

You cannot run your farm alone.

2–4 players

Ages 10+

30–45 minutes

Welcome to the Neighbourhood

Every farm on this island grows one crop and one crop only. Yours might be wheat, or apples, or a hillside of humming hives - but the far shore wants a bit of everything, and it will not take a crate of turnips and call it dinner.

So you do what islanders have always done. You wander over the hedge and pin a card to your neighbour's Notice Board. Their farm has a trick yours has not - a Draw 4, a free harvest, a wagon ready to go - and for one card it is yours to borrow, right now.

The card you leave behind stays pinned to their board. When they harvest it, it is theirs. Everybody pays, everybody gets paid, and the farm everybody needs is the farm that wins.

Plant, grow, harvest, and fill your Farmstead with receipts from the island. Six receipts, and the harvest is in.

COMPONENTS

Already know the game? Skip this page. Every component is explained again where it is first used.

Component	Count	What it is
Crop cards	105	5 crop decks of 21 cards: Wheat, Apiary, Dairy, Orchard and Vegetable.
- of which starters	15	3 per crop: a Barn (W1, A1, D1, O1, V1), a Farmstead (W2, A2, D2, O2, V2) and a Notice Board (W3, A3, D3, O3, V3). Starters have their own card back.
- of which deck cards	90	18 per crop: 5 Tier 1, 4 Tier 2, 3 Tier 3, 3 Power and 3 End-game cards.
Island cards	13	A1 to A5, B1 to B4, C1 to C3 and D1. Every island card has two token spaces, each marked "2 any".
Island tokens	24	One for each crop and one wild, at 6, 5, 4 and 3 VP: 4 per crop and 4 wild. The back shows its crop, or wild. The 3 VP and 4 VP tokens show a Worker.
Workers	25	Wooden figures, 5 in each of the five action colours: red, white, orange, yellow and green.
Player aids		For each player: Actions and Notice Boards.
Setup aid card	1	The island layout and the island tokens by player count. The first player keeps it (see Setup).
Bag		For drawing Workers at random.

The Cards by Tier

Every crop deck is built the same way.

Kind	Per crop	Build cost	Activation cost	Threshold	VP
Starter	3	never built	none (see Your Farm)	Notice Board 3+; Barn and Farmstead none	0
Tier 1	5	1 or 2 cards of its own crop	its own crop	2, 3 or 4	1
Tier 2	4	2 of its own crop + 1 of any crop	its own crop	2	2
Tier 3	3	3 of its own crop + 1 of any crop (V14: 2 + 1)	any crop (wild)	1 or 2	3
Power	3	2 of its own crop	none	none	0
End-game	3	2 of its own crop	none	none	0

Power and End-game cards print no VP. Tier 1, 2 and 3 cards print 1, 2 and 3 VP.

CORE CONCEPTS

The Three Lives of a Card

A card does a different job depending on where it is.

Where it is	What it is
In your hand (hidden)	Everything at once: a building you may build, a card you may spend to pay a cost, a card you may pay onto your own building to GROW it, or the card you pin to a neighbour's Notice Board when you visit.
On a building (face up)	Part of that building's stack, counting towards its threshold. Not in your hand and not yet yours to spend.
In your barn (public)	Harvested and ready to ship. Barn cards pay for island deliveries. Some cards also let you discard a card from your barn, or swap barn cards with your hand.

How cards travel: deck → hand → building → barn → island → discard pile → back into its crop's deck when that deck runs out.

The neighbourly route: a card in your hand, pinned to a rival's Notice Board, becomes part of their board's stack, and when they harvest that board it goes into their barn.

NEIGHBOURS

A **neighbour** is any other player at the table, not only the players sitting beside you.

Tiers

Tier 1 buildings are cheap and slow to fill; Tier 3 buildings are dear and fill after one or two cards (see The Cards by Tier). **Tier 3 buildings activate on a wild card:** pay a card of any crop to **GROW** them.

Reading a Card

Every card belongs to one crop, shown by its colour and its crop badge.

- 1 **Crop** - card colour and crop badge.
- 2 **Build cost** - 1 (1 wheat + 0 any): one icon per card.
- 3 **Activation cost** - pay this crop to GROW it.
- 4 **ACTIVATE** - pay the cost; the ability fires. Owner only.
- 5 **Ability** - fires when activated; **When Harvested:** when harvested.
- 6 **Threshold** - full at 2 cards.
- 7 **Victory points** - scored at game end.
- 8 **Name** - card names are flavour; rules text says "your Wheat buildings".

- **Crop and basket icons.** A crop icon, in the build cost or as the activation cost, must be paid with a card of that crop; a basket (wild) icon may be paid with a card of any crop.
- **When activated** normally means when its owner grows it.
- **When Harvested:** fires when its owner harvests it.
- **The kind of card** - the symbol at the top of the cost column, above the cost icons: the build symbol (a building), the Power symbol, the End-game symbol, or the starter mark.

Power and End-game cards

They cost 2 cards of their own crop. They print no VP, have no threshold, never hold cards, and are never grown or sown onto. A Power card's text works for as long as it is in your farm; an End-game card scores at game end, as it says.

CORE CONCEPTS

The Five Crops

The game uses colour in two ways:

- **Crop colours** tell you which crop a card belongs to: card faces, card backs and Notice Boards.
- **Action colours** tell you which action something gives: Workers and the player aids.

The five crops: crop colours

Crop	Card colour	Plain action	Its Notice Board power (see The Notice Board Powers)
 Orchard	 red	Draw	Draw 4.
 Dairy	 cream	Build	Build, spending cards of any crops with a discount of 1.
 Apiary	 orange	Grow	Grow a building using the top card of any deck.
 Wheat	 gold	Harvest	Harvest one of your buildings, then put 1 card from your hand into your Barn.
 Vegetable	 green	Deliver	Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.

The action colour key: action colours

Action	Colour	Worker
Draw (Draw 2, keep both)	 red	red
Build	 white	white
Grow	 orange	orange
Harvest	 yellow	yellow
Deliver	 green	green

ACTION	WORKER	ITS BOARD
 Draw		 Orchard
 Build		 Dairy
 Grow		 Apiary
 Harvest		 Wheat
 Deliver		 Vegetable

Island tokens name a crop, so they show crop icons, not action colours.

The Keywords

	You ACTIVATE it	You do not
Your own building	GROW	SOW
A neighbour's building	never	SOW (only when a card says so)
A neighbour's Notice Board	never	VISIT

REMEMBER

Putting a card on your own building does nothing unless it is your **GROW**. Putting a card on a neighbour's Notice Board is a **VISIT**: it buys you their board's power, and it leaves the card there for them.

- **ACTIVATE** - a building's ability fires. Only a building's owner ever activates it.
- **GROW** - activate one of your own buildings that is not full by paying 1 card matching its activation cost onto its stack, then resolve its ability.
- **SOW** - place a card of any crop onto a building that is not full, without activating it. Only card effects sow. A sown card counts towards the threshold. **A Notice Board is never a sow target.**
- **VISIT** - play 1 card from your hand onto a rival's Notice Board and take that board's power. Always the optional first step of your turn, never your action.

YOUR FARM

Every player starts with three cards already in play: the Farmstead, the Barn and the Notice Board. **Starters are never built:** they score no VP and never count as “a card you have built”.

The Farmstead

W2, A2, D2, O2, V2. Holds your receipts in six printed slots. It reads: “Store Receipts here. Collect 6 to trigger end of the game.” It has no ability, no stack and no threshold, and it is never a target.

When you place your sixth receipt, your Farmstead is full and the end of the game is triggered (see End of the Game).

Keep your receipts face up: each shows its crop (or wild) and its VP, and some cards count receipts by crop.

THE FARMSTEAD IS THE CLOCK

Count the empty slots on every Farmstead. When anyone fills their sixth, the round is the last.

The Barn

W1, A1, D1, O1, V1. Your barn cards sit beside it. There is no limit to how many cards your barn may hold. It prints your own-crop scorer, exactly:

Barn	Prints
W1	Game end: 1 VP for each Wheat card you have built.
A1	Game end: 1 VP for each Apiary card you have built.
D1	Game end: 1 VP for each Dairy card you have built.
O1	Game end: 1 VP for each Orchard card you have built.
V1	Game end: 1 VP for each Vegetable card you have built.

“Cards you have built” means every card in your farm except your starters, including Power and End-game cards. So your Barn counts every Tier 1, Tier 2, Tier 3, Power and End-game card of its crop that you have built. The same meaning applies to any card that says “for each X you have built”.

Farmstead - six slots for your receipts.

Barn - your barn cards sit beside it.

Notice Board - prints your crop's power and 3+. Rivals visit it; you never use its power. Place it at the edge of your farm nearest the centre.

The Notice Board

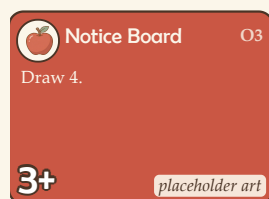

W3, A3, D3, O3, V3. Prints your crop's power (see The Notice Board Powers) and the threshold 3+. It is the only card a rival may visit. It is a building for harvesting and for nothing else:

- It has no activation cost. Nobody ever grows it or sows onto it.
- Cards arrive on it only by a visit, and leave it only when its owner harvests it.
- **You never use your own Notice Board's power.**
- Card text that counts “your buildings” counts your Notice Board(s): for example A21 The Wax Hall. A card that triggers when you place a card fires when you place a visit card: for example A16 The Beekeeper's Veil.

THE BOARD NEVER CLOSES

A Notice Board takes any number of cards. The 3+ on it is the least its owner needs before harvesting it, never a limit. Once it holds 3 or more cards its owner may harvest it; it never becomes full and never refuses a visit.

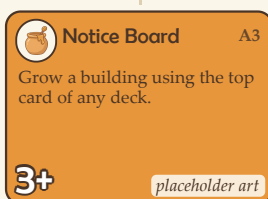

Your barn is not a card: it is the space beside your Barn where your harvested cards wait, face up, for the island.

Orchard

Dairy

Apiary

Wheat

Vegetable

SETUP

Ben Wheat 1

5 Notice Board 3+

3 Decks in play: 3

7 Orchard discard

Wheat discard

2 neutral deck

Apiary discard

On every island card: two island tokens

9 5 a demand (a crop, or wild) and its VP

10 3 the 3 VP and 4 VP tokens show a Worker

4 Ben's hand: 4

8

11 Setup aid

BACK IN THE BOX

- 3 Dairy and Vegetable cards, and the Apiary Barn and Farmstead (the three unfarmed Notice Boards go to step 5)
- 5 The Notice Board left over after dealing (here Apiary)
- 8 Island cards A3, A4, B2, B3, C1, C2, C3
- 9 The dairy, vegetable and wild tokens
- 10 The bag with the other 19 Workers

all card faces: placeholder art

Ana's hand: 4

4 Farmstead

Barn

5 Notice Board 3+

6 Notice Board 3+

1 Ana Orchard

First player, at random: keeps the Setup aid. Play clockwise.

1 **Choose crops.** Each player chooses a different crop and takes that crop's 21 cards.

2 **The neutral deck.** Choose one of the crops nobody chose at random, for example by shuffling their Barns face down under the table, or rolling a die (at four players it is simply the fifth crop). Its 18 deck cards form the neutral deck.

3 **Decks in play.** Decks in play are each player's crop plus the neutral crop: **3 / 4 / 5 decks at 2 / 3 / 4 players.** Put the cards of every crop not in play back in the box, and the neutral crop's three starters too, except the Notice Boards needed in step 5.

4 **Lay out your farm.** Take your crop's three starters (Farmstead, Barn, Notice Board) and place them face up in a row in front of you, with room above each Notice Board for a stack. Place your Notice Board at the edge of your farm nearest the centre of the table, so that rivals can reach it and read it.

5 **Two players only: the second Notice Board.** Shuffle the Notice Boards of the crops nobody is farming face down, out of sight, and deal 1 to each player. Add it to your farm beside your own Notice Board. The third goes back in the box. This board may be of the neutral crop or of a crop not in play; it does not matter. You never use its power; your rival may visit it; you harvest it like your own.

6 **Deal your hand.** Shuffle your crop's 18 deck cards. Take 4 into your hand. The other 14 are your crop's deck. Your barn starts empty.

SETUP

- The decks.** Shuffle the neutral deck. Put every deck in play face down in the middle of the table, kept separate, with room beside each for its own face-up discard pile. Crops are never shuffled together.
- Build the island.** Lay out the island cards for your player count in three rows (the rows are artwork only; every island card works the same way). Lay each row so its cards straddle the row beneath. Unused island cards go back in the box.

Players	Bottom row	Middle row	Top row	Island cards	Tokens	Wild tokens	Workers
2	A1, A2, A5	B1, B4	D1	6	12	0	6
3	A1, A2, A3, A5	B1, B2, B4	C1, C3	9	18	2	8 to 10
4	A1, A2, A3, A4, A5	B1, B2, B3, B4	C1, C2, C3	12	24	4	12

Every token in play is used: two on every island card.

- Island tokens.** Sort the island tokens by their backs. Take **the 4 tokens of each crop in play**. At three players, also take **2 of the 4 wild tokens**, chosen at random without looking; at four players take all 4 wild tokens; at two players take none. Return the rest to the box. Mix the tokens face down and place **2 face up on every island card**, covering its two "2 any" spaces. An island card may hold two tokens of the same crop.
- Workers.** Put the 25 Workers in the bag. For every token that shows a Worker (the 3 VP and 4 VP tokens), draw a Worker at random and stand it on that token. Put the bag with its remaining Workers back in the box.
- First player.** Choose the first player at random. The first player takes the Setup aid and keeps it in front of them for the whole game, as the reminder of who started: the last round ends after the player on their right (see End of the Game). Play passes clockwise.

OPEN INFORMATION

Your hand is hidden. Everything else is public: your farm, your barn, your Workers, your receipts and every discard pile.

Example: A two-player farm

▲ CENTRE OF THE TABLE ▲ Ben may visit either board, one visit per turn

Own board (Orchard)

Spare board (Vegetable)

Notice Board O3

Draw 4.

3+ placeholder art

Notice Board V3

Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.

3+ placeholder art

Farmstead

placeholder art

Store Receipts here. Collect 6 to trigger end of the game.

Barn

placeholder art

Game end: 1 VP for each Orchard card you have built.

Farmstead Barn barn cards

Example: The island at two players

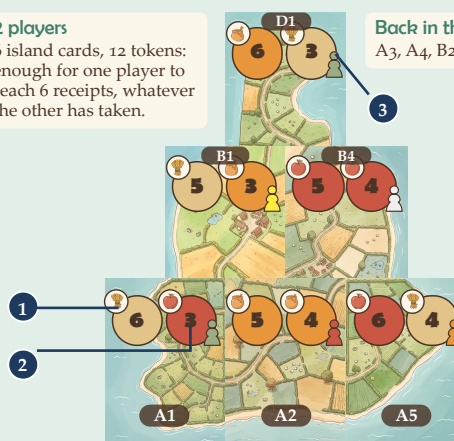

Ana (Orchard), Ben (Wheat), neutral deck Apiary: 4 tokens per crop, no wild tokens.

2 players

6 island cards, 12 tokens: enough for one player to reach 6 receipts, whatever the other has taken.

Back in the box

A3, A4, B2, B3, C1, C2, C3

- A first delivery.** Pay both tokens' demands: 2 wheat + 2 orchard. Choose one token to take.
- A Worker token.** The orchard 3 VP token shows a green Worker: take it with the token.
- A second delivery.** Once someone has taken D1's apiary 6 VP token, only the wheat 3 VP token is left: pay 2 wheat + any 2 cards, and take it and its green Worker.

YOUR TURN

The Turn in Three Steps

- 1 **Visit** (*optional, first*): play 1 card from your hand onto a rival's Notice Board and take its power at once (see The Visit).
- 2 **Take 1 action** (*required*): Draw, Build, Grow, Harvest or Deliver (see The Five Actions).
- 3 **Worker** (*optional, after your action*): discard 1 Worker to take the plain action of its colour (see Workers).

- You cannot visit after your action: the power you buy can set up your action.
- You must take an action if you can. If none is possible, pass it (you may still use a Worker).
- Finish resolving each step, including everything its abilities trigger, before starting the next.
- There is no hand limit.**

The Visit

- 1 Choose a Notice Board in a rival's farm whose power you can use right now, at least in part.
- 2 Place **1 card from your hand**, face up, on that board's stack. Any card of any crop may pay.
- 3 Take that board's power immediately, as if it were printed for you.
- 4 The card stays on that board until its owner harvests the board. When they do, it goes into their barn.

YOUR JUNK IS THEIR TREASURE

Pin your least useful card. You get their power now; at their next harvest the card rides into their barn, often as the odd crop the island wants from them.

NEVER YOUR OWN BOARD

You may never visit your own Notice Board - either of them at two players. Everything a Notice Board earns you, it earns from other people.

- At most one visit per turn.**
- You may not visit a board whose power you could not carry out at all right now.** If you could carry out part of it, you may visit and do as much as you can. The card you pin has already left your hand, so it cannot be used for the power.
- Visiting takes nothing from the board's owner: they do not act, and they do not have to agree.

The Notice Board Powers

Board	Its power, and how it works
 O3 Orchard	<i>Draw 4.</i> Draw 4 cards, one at a time, each from any deck in play.
 D3 Dairy	<i>Build, spending cards of any crops with a discount of 1.</i> Build a card from your hand. It costs 1 card fewer than printed, and you may pay the rest with cards of any crops, whatever its icons ask for. A Power or End-game card costs you 1 card of any crop.
 A3 Apiary	<i>Grow a building using the top card of any deck.</i> Choose one of your buildings that is not full and has an activation cost. Take the top card of any deck in play and put it on that building's stack as its activation payment, whatever its crop. Resolve the ability.
 W3 Wheat	<i>Harvest one of your buildings, then put 1 card from your hand into your Barn.</i> Harvest one of your full buildings, or one of your Notice Boards holding 3 or more cards, exactly as the Harvest action. Then put 1 other card from your hand into your barn (the card you pinned has already left your hand). If you have nothing you may harvest, you may still visit just for the barn card.
 V3 Vegetable	<i>Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.</i> If you can make a delivery to the island, you must (see Delivering to the Island). Up to 2 of the 4 cards you pay may be of any crop , in place of cards a token asks for. Only if you cannot make any delivery, even with that help , put 2 other cards from your hand into your barn (the card you pinned has already left your hand): as many as you can, up to 2.

YOUR TURN

Example: One visit, two ways

A round later, on Cal's turn. Ana has harvested her O3; Ben's W3 holds 3 cards.

Before Cal's turn

placeholder art

1 Cal's hand (4) Cal's barn (1)

D4 The Milking Shed 2 of 2: full

D8 The Abundant Shed 1 of 2: not full

6 Cal farms Dairy. His own D3 Notice Board is never a choice, and he may visit only one board a turn.

2 Way 1: onto Ana's O3 Orchard Notice Board

O3 Notice Board Ana's farm Draw 4.

Cal's hand: $4 - 1 + 4 = 7$

Cal's barn: 1, unchanged

0 → 1 card

5 Ana harvests O3 later, so the orchard card goes into Ana's barn.

3 Way 2: onto Ben's W3 Wheat Notice Board

W3 Notice Board Ben's farm. Harvest one of your buildings, then put 1 card from your hand into your Barn.

D4 + hand → barn

4 Hand $4 - 1 - 1 = 2$

Barn $1 + 2 + 1 = 4$

3 → 4

5 Ben harvests W3 later, so the orchard card goes into Ben's barn.

- 1 The same card. Cal pins his orchard card, the one he has no use for. What it buys depends on whose board it goes on.
- 2 Way 1, Ana's O3 (0 → 1 card): Draw 4, from any decks in play. Hand $4 - 1 + 4 = 7$; his barn stays at 1.
- 3 Way 2, Ben's W3 (3 → 4 cards): Cal harvests D4, which is full: 2 dairy cards into his barn. Then his wheat card goes from hand to barn.
- 4 Hand $4 - 1 - 1 = 2$ (2 dairy); barn $1 + 2 + 1 = 4$ (2 wheat, 2 dairy). The Visit came first, so Cal can now take Deliver as his action: for example on an island card holding a wheat token and a dairy token, or on one whose last token is wheat or dairy.
- 5 Either way, the card stays on that rival's Notice Board. When Ana (or Ben) harvests that board, the orchard card goes into their barn, never Cal's.
- 6 Not allowed: harvesting D8 with Ben's power (1 of 2 cards, not full), visiting his own D3, or visiting both Ana's and Ben's boards in one turn.

The Five Actions

Draw

Build

Grow

Harvest

Deliver

On your turn you take exactly one of these five actions. Each is described below.

1. Draw

Draw 2 cards and keep both. Draw them one at a time; each may come from any deck in play, the same deck or two different decks. You may draw from any deck in play, including the neutral deck and your rivals' decks. (Empty decks: see Small Rulings.)

2. Build

Choose a card in your hand and put it into your farm, paying its build cost with other cards from your hand (see Reading a Card). A crop icon needs a card of that crop; a basket icon takes any crop. Spent cards go to their own crops' discard piles.

- You may build a card of any crop, not only your own.
- Power and End-game cards cost 2 cards of their own crop.
- A new building arrives with an empty stack.
- Build at a discount of N** (W7, D4, D9, D10 and the Dairy Notice Board): pay N fewer cards than the printed cost, and pay the rest with cards of any crops. A cost cannot go below 0.

3. Grow

Activate one of your own buildings that is not full (each building at most once per turn, see Small Rulings).

- Pay 1 card from your hand that matches its activation cost (any crop, if the cost is a basket) onto its stack. Then resolve its ability.
- If that card fills the building, the ability still resolves, and the building is then full (see Buildings).
- A full building cannot be grown** until its owner harvests it.
- You can never grow a Notice Board, a Barn, a Farmstead, a Power card or an End-game card.

YOUR TURN

4. Harvest

Choose one of your own full buildings, or one of your Notice Boards holding 3 or more cards, and move its whole stack into your barn.

- The building stays in your farm, empty and ready to take cards again.
- Harvesting scores no points by itself. The cards are the prize.
- A building that is not full cannot be harvested, however many cards it holds, unless a card's own text says so. (Cards such as W8, W11, W12 and W13 print their own exceptions.)
- Some cards move single cards from a building into your barn (A11, V11). That is not a harvest: see Card Notes.

5. Deliver

Make one delivery to the island: pay 4 cards from your barn to one island card and take one of its tokens as your receipt (see Delivering to the Island).

ONE RULE, ONE PAGE

Every delivery, whatever pays for it, works the same way: see Delivering to the Island for exactly how much, and what you get.

Buildings

- Only the owner activates a building.** You never need to read a neighbour's building text to take your turn.
- Full and clogged.** When a building's stack reaches its threshold it is full. A full building:
 - takes no more cards, from anyone, by any route;
 - cannot be grown, so its "when activated" ability cannot fire. Its **When Harvested:** line still happens when you harvest it;
 - stays that way until its owner harvests it, or a card moves cards off it.

- Cards land on a building in three ways:** a **GROW** (your building, matching card, you take the ability), a **SOW** (a card effect, any card, nothing fires), or a **VISIT** (a rival's Notice Board, any card, you take its power).
- Notice Boards never clog** (see The Notice Board).

CHEAP AND PATIENT, OR DEAR AND HUNGRY

Cheap buildings have high thresholds and soak up cards for a long time before they clog. Expensive buildings have low thresholds: they fire at once, but you will be harvesting them constantly.

Example: A typical turn

3 players: Ana farms Orchard, Ben Wheat, Cal Dairy. Neutral deck: Vegetable.

Cards: placeholder art	Before Ben's turn	1 Visit: Ana's O3	2 Action: Grow W4	3 Worker: Harvest
O3 Notice Board Draw 4. Ana's farm	= 2	= 3	= 3	= 3
Ben's hand	= 4	= 7	= 7	= 6
W4 Wheat Field Draw 1. When Harvested: Put 1 card from your hand into your Barn.	1 of 2	1 of 2	2 of 2: full	empty: 0 of 2
Ben's barn	= 1	= 1	= 1	= 4
Ben's Workers	yellow: Harvest	yellow: Harvest	yellow: Harvest	→ to the box = 0

- Visit.** Ben pins his vegetable card to Ana's O3 Notice Board (2 → 3 cards) and takes its power, *Draw 4:* from the Wheat, Wheat, Dairy and Orchard decks. Hand 4 - 1 + 4 = 7.
- Action: Grow.** Ben pays 1 wheat card onto W4 Wheat Field: 2 of 2, so it is full. Its ability still fires: *Draw 1,* from the Vegetable deck. Hand 7 - 1 + 1 = 7.
- Worker: Harvest.** Ben discards his yellow Worker to the box and harvests W4: both wheat cards go into his barn. W4's *When Harvested:* line puts his vegetable card from his hand into his barn.
- Result.** Hand 6; barn 1 + 2 + 1 = 4 (1 orchard, 2 wheat, 1 vegetable); W4 is empty, ready to grow again. Ben ends his turn with 6 cards in hand and 4 in his barn: 10 cards, up from 5.

THE ISLAND

Delivering to the Island

Island cards and tokens

Every island card starts the game with two island tokens. Each token shows:

- a **demand**: a crop, which asks for **2 cards of that crop**, or **wild**, which asks for **any 2 cards** (they may be different crops);
- its **VP**: 3, 4, 5 or 6;
- on the **3 VP and 4 VP tokens**, a Worker, standing on it since setup.

Under each token the island card prints **2 any**.

Paying for a delivery

- 1 Choose any island card that still has a token. Any island card is legal on any turn.
- 2 Pay **exactly 4 cards from your barn**:
 - **First delivery** (both tokens still there): 2 cards for each token's demand. If both tokens show the same crop, that is 4 cards of that crop.
 - **Second delivery** (one token left): 2 cards for that token's demand, **plus 2 cards of any crops** for the "2 any" the first token uncovered.
- 3 Paid cards go to their own crops' discard piles.

Delivery	You pay	Cards
First	both tokens' demands	4
Second	the last token's demand + 2 any	4

BARN ONLY

You can never deliver from your hand. Every card you deliver was harvested first - from your own buildings, or from the cards your neighbours pinned to your board.

EXACTLY AS ASKED

You may deliver only if you can pay exactly what the island card asks. No card stands in for another, except with the Vegetable Notice Board: up to 2 of its 4 cards may be of any crop.

Taking your receipt

- **First delivery**: choose **either** token and take it. The other stays for the next deliverer.
- **Second delivery**: take the last token. The island card is finished.
- If a Worker stands on your token, **take the Worker too** (see Workers).

The token is your **receipt**. Put it face up in an empty slot of your Farmstead. When you place your sixth, the end is triggered (see End of the Game). A card that gives you two receipts from one delivery (V14) fills two slots, and both count.

Receipts keep their crop. A wild token is a wild receipt. Some cards score receipts by crop (W21, V19, V21).

The order a delivery resolves in

Pay the 4 cards → take the token (and its Worker) → any card text that triggers on delivering → check for your sixth receipt.

Island tokens can move

V5 lets you **SWAP** two tokens on two different island cards. Each token keeps its VP and its Worker. A token on an island card that has already lost its other token may be swapped.

THE ISLAND

Example: Two deliveries

The same two-player game as the island example.

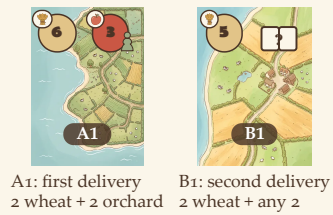

1 Earlier: Ben's first delivery

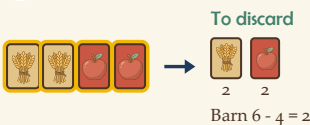

2 Before Ana's turn

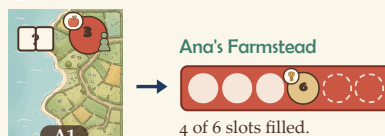

3 Ana's choice

4 Pay

5 Take the token

6 End check

4 receipts, not 6: the game goes on.

What next? Ben needs a pair of wheat and any 2 cards to finish B1. Whoever finishes A1 needs 2 orchard and any 2 cards, and takes the green Worker with the 3 VP.

- Earlier, Ben paid B1's wheat and apiary demands and chose the apiary 3 VP token, taking the yellow Worker. B1 keeps its wheat 5 VP token and shows one 2 any.
- Before Ana's turn her barn holds 6 cards (2 wheat, 1 apiary, 3 orchard) and her Farmstead 3 receipts.
- Ana's choice. A1 is a first delivery (2 wheat + 2 orchard, choose wheat 6 or orchard 3 + Worker); B1 is a second delivery (2 wheat + any 2). She chooses A1 for the wheat 6 VP.
- Pay. 2 wheat + 2 orchard go to their discard piles. Barn 6 - 4 = 2 (1 apiary, 1 orchard).
- Take the token. The wheat 6 VP receipt goes in her Farmstead: 4 of 6. A1 now shows the orchard 3 VP token and one 2 any.
- End check. 4 receipts, not 6, so the game goes on.

FIRST OR SECOND?

The first delivery pays for two demands and picks the better token. The second is easier to pay, since half of it is any crop, but takes what is left. A Worker on the lower token can make it the better one.

Workers

Workers are the wooden figures on the island, one standing on every 3 VP and 4 VP token at the start of the game.

Each Worker gives the plain action of its colour: ■ red Draw, □ white Build, ■ orange Grow, ■ yellow Harvest, ■ green Deliver (see The Five Crops).

- Getting Workers:** when you take a token with a Worker on it, take the Worker too (see Delivering to the Island).
- Using Workers:** after your action, you may discard 1 Worker to take the plain action of its colour. It then leaves the game (return it to the box).

- One per turn.** It is always the plain action, never a Notice Board power.
- You may not use a Worker whose action you cannot take.
- You may use a Worker on a turn where you had to pass your action.
- A Worker's Grow places its card as normal and can fill the building.
- A green Worker's Deliver is an island delivery, paid in full from your barn.
- Workers you hold are public. Unused Workers score nothing.

CARD NOTES

Most cards say all they need. These notes settle the questions players ask most.

- **Discarding from your barn** (V8, V10, V12, V15): put the card on its crop's discard pile. **It is not a delivery, and paying for a delivery is not a discard**, so V17 draws 1 for each card that V8, V10, V12 or V15 discards from your barn, and never for the cards you pay for a delivery.
- **Deck card** (W5, W9, W15, A8, A9, A13, D14, D15, V4): the top card of any deck in play, your choice of deck, taken without looking. If a card says "of one deck", all the cards come from the same deck.
- **Moving cards off a building** (A11, V11): the card goes straight into your barn. **This is not a harvest**, so no "When Harvested:" line fires and W16 and W18 do not count it. It may take cards off a full building. It never takes cards off a Notice Board.
- **"Base action"** (V10) means the plain action of that card's crop: Wheat Harvest, Vegetable Deliver, Orchard Draw 2, Apiary Grow, Dairy Build. Discard your cards first, then take the actions in the order you discarded them.
- **"Notice Board action"** (V12) means that crop's Notice Board power (see The Notice Board Powers), even if that board is not on the table. It is not a visit: no card is pinned, nobody is paid, and cards that trigger on a visit do not fire. The discard happens even if the power then does nothing.
- **"Destroy this building"** (V14) means demolish it: its cards go to the discard piles and it stops counting as built.
- **When several abilities trigger at once**, the player whose turn it is chooses the order. With both V16 and V18, V18 checks your barn before V16's card arrives.
- **V3 on a second delivery**: the 2 any-crop cards may also replace the token's pair, so all 4 cards may be of any crop.
- **V5 The Coastal Trading Depot**: "demand tokens" are island tokens, and "2 islands" are two island cards.
- **V11 The Market Master**: count your barn first; cards that arrive during the effect do not add to the count. There is no maximum.
- **V14 The Distribution Center**: takes the tokens left on the island card you deliver to: both on an untouched card (pay as a first delivery), the last one on a card with one token (pay as a second delivery). If you cannot deliver, nothing happens and V14 stays.
- **V19 The Market Gazette**: each receipt counts in one pair only (three wheat receipts make one pair). Wild receipts pair only with each other.
- **V21 The Harvest Ledger** and **W21 The Bread Hall**: a wild receipt is not a vegetable receipt, and counts as a crop of its own for W21.
- **D13 The Cheese Vault**: counts every building you have built so far, not only this turn.
- **W10 The Furrow**: with fewer than 3 cards in hand, put in all you have.
- **W12 Crop Rotation** harvests every one of your own Wheat buildings with a card on it, itself included. **W13 The Bakery** harvests itself too. W13 harvests empty buildings (their "When Harvested:" lines fire), but never a Notice Board holding fewer than 3 cards.
- **A8 The Wild Hive**: the two sown cards may go onto the same building or two different ones, of one neighbour or two.
- **A13 The Queen's Hive** and **A14 The Honeycomb Tower** count themselves as Apiary buildings.
- **A15 The Royal Apiary** and **A21 The Wax Hall** count your Notice Board(s).
- **Helping Hand**: W18, A18, D18, O18 and V18 share a name but are five different cards. D18 counts any two cards you build, Power and End-game cards included.
- **Buildings** in card text are cards with a threshold (Tier 1, 2 and 3 cards, and Notice Boards where the card says "your buildings"). A "1VP building" (A20), "2VP building" (O20) or "3VP building" (D21) is a building you have built that prints that VP.

END OF THE GAME

The End

- The end is triggered the moment a player places their sixth receipt in their Farmstead.
- Finish the current round, so that every player has had the same number of turns: play continues until the player sitting to the right of the first player (the player with the Setup aid) has taken their turn. Then the game ends. If that player triggered it, the game ends at the end of their turn.
- The triggering player finishes their whole turn, including their Worker.
- A receipt beyond the sixth (for example from V14) is placed beside the Farmstead and scores; the end is triggered as normal.

Scoring

Add up three things, all on the table in front of you:

- 1 **Receipts:** the VP printed on your receipt tokens (3 to 6 each).
- 2 **Printed VP** on every card you have built: every card in your farm except your starters. Power and End-game cards print none.
- 3 **End-game scoring:** each End-game card you have built, scored as it says, and your Barn's own-crop scorer.

Workers score nothing. Cards in your hand and barn score nothing unless a card says so.

TIE-BREAK

The tied player with the most cards in hand and barn combined wins. If still tied, they share the victory.

Example: Scoring Ana's farm

Ana (Orchard) placed her sixth receipt; the round finished, and the game is scored.

O2 Farmstead (6 receipts) 1 **O1 Barn** (Game end: 1 VP for each Orchard card you have built.) 4 **O3** (3+) **V3** (3+)

Starters: never built, 0 VP
Cards: placeholder art

Built cards (7) 2

O4 The Apple Grove Tier 1 (1) **O6** The Cherry Grove Tier 1 (1) **O8** The Heritage Grove Tier 1 (1) **O9** The Fruit Stand Tier 2 (2) **W11** The Bakehouse Tier 2 (2) **O16** The Fruit Store Power (no VP) **O20** Crop Diversity End-game (no VP)

5 1 Worker score nothing

Source	Working	VP
1 Receipts	6 + 5 + 4 + 3 + 6 + 5	29
2 Printed VP on built cards	1 + 1 + 1 + 2 + 2	7
3 O20 Crop Diversity	2VP buildings (O9, W11) × 2 VP	4
4 O1 Barn scorer	Orchard cards built: O4, O6, O8, O9, O16, O20	6
5 Worker	score nothing	0
Total	29 + 7 + 4 + 6	46

- 1 **Receipts:** the VP printed on each of Ana's six receipts.
- 2 **Printed VP:** every card she built scores its wreath; Power and End-game cards print none. Starters (O1, O2, O3, V3) are never built: 0.
- 3 **O20 Crop Diversity** (Game end: 2 VP for each 2VP building you have built): O9 and W11 print 2 VP, so $2 \times 2 = 4$.
- 4 **O1 Barn:** 1 VP for each Orchard card she built: O4, O6, O8, O9, O16 and O20. W11 is a Wheat card, so it does not count.
- 5 **Workers score nothing.** For a tie, see Tie-break.

SMALL RULINGS

- **A building may be activated at most once per turn.** You cannot **GROW** the same building twice in one turn, whether with a card, a Worker, a Notice Board power or another card's ability.
- **"Whenever" abilities fire every time.** A "whenever" ability fires each time its trigger happens, even several times in one turn. Each building built or harvested, and each card placed, is its own trigger: an action that builds 2 buildings triggers "Whenever you Build" twice. For example, W16 The Granary draws once for each building you harvest, and D16 The Ledger draws once for each building you build.
- **Empty decks.** When you must draw from a crop's deck and it is empty, shuffle that crop's discard pile to make its new deck. If both are empty, you cannot draw from that crop; if the effect lets you choose a deck, choose another deck in play.
- **Discards.** Cards spent, paid or discarded always go face up to their own crop's discard pile, whatever farm they came from.
- **Drawing only from decks in play.** "Any deck" always means any deck in play. "Draw 2" and every "Draw N" draws one card at a time, each from any deck in play.

SMALL RULINGS

- **"You may"** in an ability is optional. An ability without it is not. If an ability cannot be carried out in full, carry out as much of it as you can.
- **A card sown onto a neighbour's building is not a visit.** It buys nothing and pays nobody.
- **A card taken off a stack by a card effect is not harvested,** so harvest abilities do not fire.
- **Built** means paid for and put into your farm (see Your Farm). A demolished card stops counting as built.
- **Buildings in card text.** "Your buildings" are the cards in your farm that have a threshold, including your Notice Board(s); never a Power card, End-game card, Barn or Farmstead. **SOW** and **GROW** never reach a Notice Board, and a Notice Board is only ever harvested when it holds 3 or more cards, whatever a card says.

GLOSSARY

2 any - The printed space under each island token: the second delivery pays any 2 cards for it. *See Delivering to the Island.*

Action colour - The colour that names an action on Workers and aids: red Draw, white Build, orange Grow, yellow Harvest, green Deliver. *See The Five Crops.*

ACTIVATE - A building's ability fires. Only the owner activates a building. *See The Keywords.*

Barn - Your starter that holds your harvested cards and prints your own-crop scorer. Your barn cards are public. *See Your Farm.*

Base action - The plain action of a crop (V10). *See Card Notes.*

Build at a discount of N - Build, paying N fewer cards than the card's cost. With a discount you may pay the rest with cards of any crops. *See The Notice Board Powers.*

Crop colour - The colour of a crop's cards. *See The Five Crops.*

Deck card - The top card of a deck in play, taken without looking. *See Card Notes.*

Deck in play - One of the 3 / 4 / 5 crop decks on the table. *See Setup.*

Deliver - An island delivery: 4 cards from your barn for a token. *See Delivering to the Island.*

Demolish - Remove a built card from your farm; its cards are discarded and it stops counting as built. V14's "destroy" means the same. *See Card Notes.*

Discard from your barn - Put a barn card on its crop's discard pile, as a card says. Not a delivery. *See Card Notes.*

Farmstead - Your starter with six receipt slots. *See Your Farm.*

Fill - Make a building's stack reach its threshold, so it is full. *See Buildings.*

First player - Chosen at random; keeps the Setup aid all game. *See Setup.*

Full - A building whose stack has reached its threshold. *See Buildings.*

GROW - Activate your own building that is not full by paying a matching card. *See The Keywords.*

Harvest - Move a full building's stack (or a Notice Board's 3+ stack) into your barn. *See Harvest.*

Helping Hand - The name of five different Power cards, one per crop. *See Card Notes.*

Island token - A token on an island card: a demand, a VP value and sometimes a Worker. Some cards call it a demand token. *See Delivering to the Island.*

Move - Take a card off a building and put it straight into your barn. Not a harvest. *See Card Notes.*

Neighbour - Any other player. *See The Three Lives of a Card.*

Notice Board - Your starter that prints your crop's power; rivals visit it. *See The Visit.*

Notice Board action - A crop's Notice Board power (V12). *See Card Notes.*

NVP building - A building you have built that prints N VP (A20, O20, D21). *See Card Notes.*

Plain action - One of the five actions exactly as The Five Actions describes, never a Notice Board power.

Receipt - An island token you took with a delivery, kept face up in your Farmstead. It keeps its crop and VP. *See Delivering to the Island.*

Round - One turn for every player, beginning with the first player. *See End of the Game.*

SOW - Place a card on a building that is not full, without activating it. *See The Keywords.*

Stack - The cards on a building. *See Buildings.*

Suit - On a card, the same as crop. *See The Five Crops.*

SWAP - Exchange two island tokens on two different island cards (V5), or cards between your hand and your barn (V6). *See Delivering to the Island.*

Threshold - The number of cards that fills a building; 3+ on a Notice Board is a minimum. *See Reading a Card.*

VISIT - Pay a hand card onto a rival's Notice Board for its power. *See The Visit.*

Wild token - An island token whose demand is any 2 cards, which may be different crops. *See Delivering to the Island.*

Worker - A wooden figure standing on a 3 VP or 4 VP token; take it with the token and discard it after your action for the plain action of its colour. *See Workers.*

QUICK REFERENCE

Your turn

- 1 **Visit** (optional): 1 hand card onto a rival's Notice Board; take its power now.
- 2 **1 Action**: Draw, Build, Grow, Harvest or Deliver.
- 3 **Worker** (optional): discard 1 for its colour's plain action. One per turn. Red Draw, white Build, orange Grow, yellow Harvest, green Deliver.

A building may be activated at most once per turn; "whenever" abilities fire every time.

Actions

- **Draw** - 2 cards, one at a time, from any decks in play. Keep both.
- **Build** - put a hand card into your farm; pay its cost icons from your hand.
- **Grow** - pay 1 matching card onto your building that is not full; take its ability.
- **Harvest** - move a full building's stack, or a Notice Board's 3+ stack, into your barn.
- **Deliver** - pay 4 barn cards to an island card; take a token.

The Visit

- Never your own board. One visit per turn.
- Only a board whose power you can use now, at least in part. Do as much as you can.
- The card stays; its owner harvests it.

Notice Board powers

-  **Orchard** (Draw): Draw 4.
-  **Dairy** (Build): Build, spending cards of any crops with a discount of 1.
-  **Apiary** (Grow): Grow a building using the top card of any deck.
-  **Wheat** (Harvest): Harvest one of your buildings, then put 1 card from your hand into your Barn. (Nothing full? You may still visit for the barn card.)
-  **Vegetable** (Deliver): Deliver - 2 of the cards may be any crop. If you cannot, put 2 cards from your hand into your Barn.

The island

- Any island card with a token left. Always 4 cards from your barn.
- **First delivery**: both tokens' demands (2 of a crop each; wild: any 2). Choose a token.
- **Second delivery**: the last token's demand + any 2 cards. Take the last token.
- Take the Worker on your token. Receipts keep their crop.
- No substitutes (except the Vegetable board's 2 any-crop cards).

Workers

- After your action, discard 1 for its colour's plain action. One per turn.
- Red Draw, white Build, orange Grow, yellow Harvest, green Deliver.

Barn cards

- Only deliveries and card effects take cards out of your barn.
- A barn discard is not a delivery; a delivery is not a discard.

End and scoring

- Sixth receipt: finish the round (it ends with the player to the right of the first player), then score. Extra receipts score.
- Receipts (3 to 6 each) + printed VP + End-game cards (and your Barn).
- Power and End-game cards print no VP. Workers score nothing. Tie: most cards in hand and barn, then share.
