

You cannot run your farm alone.

2–4 players

Ages 10+

40–60 minutes

Welcome to the Neighbourhood

Every farm on this island grows one crop and one crop only. Yours might be wheat, or apples, or a hillside of humming hives - but the far shore wants a bit of everything, and it will not take a crate of turnips and call it dinner.

So you do what islanders have always done. You wander over the hedge and pin a card to your neighbour's Notice Board. Their farm has a trick yours has not - a Draw 4, a free harvest, a wagon ready to go - and for one card it is yours to borrow, right now.

The card you leave behind stays pinned to their board. When they harvest it, it is theirs. Everybody pays, everybody gets paid, and the farm everybody needs is the farm that wins.

Plant, grow, harvest, and fill your Farmstead with receipts from the island. Six receipts, and the harvest is in.

COMPONENTS

Already know the game? Skip this page. Every component is explained again where it is first used.

Component	Count	What it is
Crop cards	105	5 crop decks of 21 cards: Wheat, Apiary, Dairy, Orchard and Vegetable.
- of which starters	15	3 per crop: a Barn (W1, A1, D1, O1, V1), a Farmstead (W2, A2, D2, O2, V2) and a Notice Board (W3, A3, D3, O3, V3). Starters have their own card back.
- of which deck cards	90	18 per crop: 5 Tier 1, 4 Tier 2, 3 Tier 3, 3 Power and 3 End-game cards.
Aerodrome cards	4	One per player; not part of any deck. It reads "Deliver 1 card of any crop from your barn. Take a balloon. Perform its colour's action." with the Draw, Build, Grow and Harvest key.
Island cards	13	A1 to A5, B1 to B4, C1 to C3 and D1. Every island card has 2 crates, a 6 VP space and a 3 VP space.
Receipt tokens	24	12 printed 6 VP and 12 printed 3 VP: one for every delivery space at four players.
Demand tokens	24	4 of each crop (20) and 4 cornucopias (wild). All share one back, so a token can be turned face down.
Balloons	4	In action colours:  red (Draw),  white (Build),  orange (Grow) and  yellow (Harvest).
Village Store coins	20	5 per player at four players.
Workers	25	Wooden figures, 5 in each of the five action colours: red, white, orange, yellow and green.
Player aids		For each player: Actions, Notice Boards and Workers (the Workers aid also covers coins).
Setup aid card	1	The island layout and demand tokens by player count. The first player keeps it (see Setup).
Bag		For drawing Workers at random.

The Cards by Tier

Every crop deck is built the same way.

Kind	Per crop	Build cost	Activation cost	Threshold	VP
Starter	3	never built	none (see Your Farm)	Notice Board 3+; Barn and Farmstead none	0
Tier 1	5	1 or 2 cards of its own crop	its own crop	2, 3 or 4	1
Tier 2	4	2 of its own crop + 1 of any crop	its own crop	2	2
Tier 3	3	3 of its own crop + 1 of any crop	any crop (wild)	1 or 2	3
Power	3	2 of its own crop	none	none	1
End-game	3	2 of its own crop	none	none	0

CORE CONCEPTS

The Three Lives of a Card

A card does a different job depending on where it is.

Where it is	What it is
In your hand (hidden)	Everything at once: a building you may build, a card you may spend to pay a cost, a card you may pay onto your own building to GROW it, or the card you pin to a neighbour's Notice Board when you visit.
On a building (face up)	Part of that building's stack, counting towards its threshold. Not in your hand and not yet yours to spend.
In your barn (public)	Harvested and ready to ship. Barn cards pay for island deliveries, for balloon flights, and at the Village Store. Nothing else.

How cards travel: deck → hand → building → barn → island, balloon or Store → discard pile → back into its crop's deck when that deck runs out.

The neighbourly route: a card in your hand, pinned to a rival's Notice Board, becomes part of their board's stack, and when they harvest that board it goes into their barn.

NEIGHBOURS

A **neighbour** is any other player at the table, not only the players sitting beside you.

Tiers

Tier 1 buildings are cheap and slow to fill; Tier 3 buildings are dear and fill after one or two cards (see The Cards by Tier). **Tier 3 buildings activate on a wild card:** pay a card of any crop to **GROW** them.

Reading a Card

Every card belongs to one crop, shown by its colour and its crop badge.

- 1 **Crop** - card colour and crop badge.
- 2 **Build cost** - 1 (1 wheat + 0 any): one icon per card.
- 3 **Activation cost** - pay this crop to GROW it.
- 4 **ACTIVATE** - pay the cost; the ability fires. Owner only.
- 5 **Ability** - fires when activated; **HARVEST**: when harvested.
- 6 **Threshold** - full at 2 cards.
- 7 **Victory points** - scored at game end.
- 8 **Tier noun** - a Wheat Field is a FIELD.

- **Crop and basket icons.** A crop icon, in the build cost or as the activation cost, must be paid with a card of that crop; a basket (wild) icon may be paid with a card of any crop.
- **When activated** normally means when its owner grows it.
- **The kind of card** - the symbol at the top of the cost column, above the cost icons: the build symbol (a building), the Power symbol, the End-game symbol, or the starter mark.

Power and End-game cards

They cost 2 cards of their own crop (or 2 coins, see The Village Store). They have no threshold, never hold cards, and are never grown or sown onto. A Power card's text works for as long as it is in your farm; an End-game card scores at game end, as it says.

CORE CONCEPTS

The Five Crops

The game uses colour in two ways:

- **Crop colours** tell you which crop a card belongs to: card faces, card backs and Notice Boards.
- **Action colours** tell you which action something gives: balloons, Workers and the player aids.

The five crops: crop colours

Crop	Card colour	Plain action	Its Notice Board power (see The Notice Board Powers)
 Orchard	 red	Draw	Draw 4.
 Dairy	 cream	Build	Build, spending cards of any crops. You may then Grow that building with a deck card of any crop.
 Apiary	 orange	Grow	Grow a building using the top card of any deck.
 Wheat	 gold	Harvest	Harvest one of your buildings, then put 1 card from your hand into your barn.
 Vegetable	 green	Deliver	Deliver. If you cannot, put 2 cards from your hand into your barn.

The action colour key: action colours

Action	Colour	Balloon	Worker
Draw (Draw 2, keep both)	 red	red	red
Build	 white	white	white
Grow	 orange	orange	orange
Harvest	 yellow	yellow	yellow
Deliver	 green	none	green

ACTION	WORKER	BALLOON	ITS BOARD
 Draw			 Orchard
 Build			 Dairy
 Grow			 Apiary
 Harvest			 Wheat
 Deliver		-	 Vegetable

Demand tokens name a crop, so they show crop icons, not action colours.

The Keywords

	You ACTIVATE it	You do not
Your own building	GROW	SOW
A neighbour's building	never	SOW (only when a card says so)
A neighbour's Notice Board	never	VISIT

REMEMBER

Putting a card on your own building does nothing unless it is your **GROW**. Putting a card on a neighbour's Notice Board is a **VISIT**: it buys you their board's power, and it leaves the card there for them.

- **ACTIVATE** - a building's ability fires. Only a building's owner ever activates it.
- **GROW** - activate one of your own buildings that is not full by paying 1 card matching its activation cost onto its stack, then resolve its ability. (A coin may pay instead, see Grow.)
- **SOW** - place a card of any crop onto a building that is not full, without activating it. Only card effects sow. A sown card counts towards the threshold. **A Notice Board is never a sow target.**
- **VISIT** - play 1 card from your hand onto a rival's Notice Board and take that board's power. Always the optional first step of your turn, never your action.

YOUR FARM

Every player starts with three cards already in play: the Farmstead, the Barn and the Notice Board. **Starters are never built:** they score no VP and never count as “a card you have built”.

The Farmstead

W2, A2, D2, O2, V2. Holds your receipts in six printed slots. It reads: “Store Receipts here. Collect 6 to trigger end of the game.” It has no ability, no stack and no threshold, and it is never a target.

When you place your sixth receipt, your Farmstead is full and the end of the game is triggered (see End of the Game).

THE FARMSTEAD IS THE CLOCK

Count the empty slots on every Farmstead. When anyone fills their sixth, the round is the last.

The Barn

W1, A1, D1, O1, V1. Your barn cards sit beside it. There is no limit to how many cards your barn may hold. It prints your own-crop scorer, exactly:

Barn	Prints
W1	Game end: 1 VP for each Wheat card you have built.
A1	Game end: 1 VP for each Apiary card you have built.
D1	Game end: 1 VP for each Dairy card you have built.
O1	Game end: 1 VP for each Orchard card you have built.
V1	Game end: 1 VP for each Vegetable card you have built.

“Cards you have built” means every card in your farm except your starters, including Power and End-game cards. So your Barn counts every Tier 1, Tier 2, Tier 3, Power and End-game card of its crop that you have built. The same meaning applies to any card that says “for each X you have built”.

Farmstead - six slots for your receipts.

Barn - your barn cards sit beside it.

Notice Board - prints your crop's power and 3+. Rivals visit it; you never use its power. Place it at the edge of your farm nearest the centre.

The Notice Board

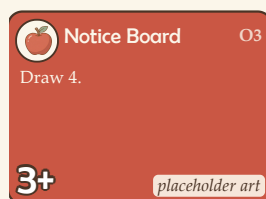

W3, A3, D3, O3, V3. Prints your crop's power (see The Notice Board Powers) and the threshold 3+. It is the only card a rival may visit. It is a building for harvesting and for nothing else:

- It has no activation cost. Nobody ever grows it or sows onto it.
- Cards arrive on it only by a visit, and leave it only when its owner harvests it.
- **You never use your own Notice Board's power.**
- Card text that counts “your buildings” counts your Notice Board(s): for example A21 The Wax Hall. A card that triggers when you place a card fires when you place a visit card: for example A16 The Beekeeper's Veil.

THE BOARD NEVER CLOSES

A Notice Board takes any number of cards. The 3+ on it is the least its owner needs before harvesting it, never a limit. Once it holds 3 or more cards its owner may harvest it; it never becomes full and never refuses a visit.

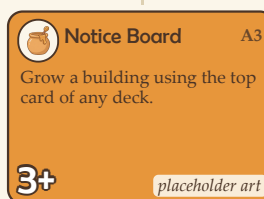

Every player also has an Aerodrome, which is not a starter (see The Aerodrome and Balloons).

Orchard

Dairy

Apiary

Wheat

Vegetable

SETUP

Ben Wheat

1 Choose crops. Each player chooses a different crop and takes that crop's 21 cards.

2 The neutral deck. Choose one of the crops nobody chose at random, for example by drawing one of their Barns without looking (at four players it is simply the fifth crop). Its 18 deck cards form the neutral deck.

3 Decks in play: 3

4 Lay out your farm. Take your crop's three starters (Farmstead, Barn, Notice Board) and place them face up in a row in front of you, with room above each Notice Board for a stack. Place your Notice Board at the edge of your farm nearest the centre of the table, so that rivals can reach it and read it.

5 Two players only: the second Notice Board. Shuffle the Notice Boards of the crops nobody is farming and deal 1 to each player. Add it to your farm beside your own Notice Board. The third goes back in the box. This board may be of the neutral crop or of a crop not in play; it does not matter. You never use its power; your rival may visit it; you harvest it like your own.

6 Deal your hand. Shuffle your crop's 18 deck cards. Take 4 into your hand. The other 14 are your crop's deck. Your barn starts empty.

BACK IN THE BOX

3 Dairy and Vegetable cards, and the Apiary Barn and Farmstead (the three unfarmed Notice Boards go to step 5)

5 The Notice Board left over after dealing (here Apiary)

9 The other 10 coins

10 Island cards A3, A4, B2, B3, C1, C2, C3

12 The bag with the other 19 Workers

all card faces: placeholder art

Ana Orchard

1 First player, at random: keeps the Setup aid. Play clockwise.

- 1 Choose crops. Each player chooses a different crop and takes that crop's 21 cards.
- 2 The neutral deck. Choose one of the crops nobody chose at random, for example by drawing one of their Barns without looking (at four players it is simply the fifth crop). Its 18 deck cards form the neutral deck.
- 3 Decks in play. Decks in play are each player's crop plus the neutral crop: 3 / 4 / 5 decks at 2 / 3 / 4 players. Put the cards of every crop not in play back in the box, and the neutral crop's three starters too, except the Notice Boards needed in step 5.
- 4 Lay out your farm. Take your crop's three starters (Farmstead, Barn, Notice Board) and place them face up in a row in front of you, with room above each Notice Board for a stack. Place your Notice Board at the edge of your farm nearest the centre of the table, so that rivals can reach it and read it.

- 5 Two players only: the second Notice Board. Shuffle the Notice Boards of the crops nobody is farming and deal 1 to each player. Add it to your farm beside your own Notice Board. The third goes back in the box. This board may be of the neutral crop or of a crop not in play; it does not matter. You never use its power; your rival may visit it; you harvest it like your own.
- 6 Deal your hand. Shuffle your crop's 18 deck cards. Take 4 into your hand. The other 14 are your crop's deck. Your barn starts empty.

SETUP

7 The decks. Shuffle the neutral deck. Put every deck in play face down in the middle of the table, kept separate, with room beside each for its own face-up discard pile. Crops are never shuffled together.

8 Aerodromes and balloons. Give each player an Aerodrome card; place it beside your farm. Put the four balloons in the centre of the table.

10 Build the island. Lay out the island cards for your player count in three rows (the rows are artwork only; every island card works the same way). Lay each row so its cards straddle the row beneath. Unused island cards go back in the box.

Players	Bottom row	Middle row	Top row	Island cards	Crates	Delivery spaces
2	A1, A2, A5	B1, B4	D1	6	12	12
3	A1, A2, A3, A5	B1, B2, B4	C1, C3	9	18	18
4	A1, A2, A3, A4, A5	B1, B2, B3, B4	C1, C2, C3	12	24	24

11 Demand tokens. Take 4 demand tokens of each crop in play, plus cornucopias to make up one token per crate: 0 cornucopias at 2 players (12 tokens), 2 at 3 players (18), 4 at 4 players (24). Shuffle them face down and place one face up on every crate.

12 Receipts and Workers. Place a 6 VP receipt on every 6 VP space and a 3 VP receipt on every 3 VP space. Put the 25 Workers in the bag, draw one at random for every island card, and stand it on that card's 3 VP space. Put the bag with its remaining Workers back in the box.

13 First player. Choose the first player at random. The first player takes the Setup aid and keeps it in front of them for the whole game, as the reminder of who started: the last round ends after the player on their right (see End of the Game). Play passes clockwise.

OPEN INFORMATION

Your hand is hidden. Everything else is public: your farm, your barn, your coins, your Workers, your receipts and every discard pile.

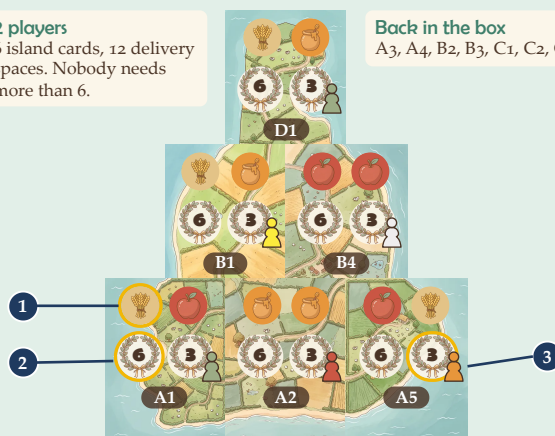

9 The Village Store. Put 5 coins per player in a shared supply in the centre: 10 / 15 / 20 at 2 / 3 / 4 players. Nobody starts with a coin. Return any other coins to the box.

Example: The island at two players

Ana (Orchard), Ben (Wheat), neutral deck Apiary: 4 tokens per crop.

2 players
6 island cards, 12 delivery spaces. Nobody needs more than 6.

Back in the box
A3, A4, B2, B3, C1, C2, C3

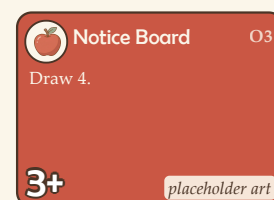

1. **Crate.** Its token names the crop: 2 wheat cards from your barn.
2. **6 VP space.** Take its 6 VP receipt.
3. **3 VP space.** Take its 3 VP receipt and the Worker on it.

Example: A two-player farm

▲ CENTRE OF THE TABLE ▲ Ben may visit either board, one visit per turn

Own board (Orchard)

Spare board (Vegetable)

Farmstead

Barn

Aerodrome

YOUR TURN

The Turn in Three Steps

- 1 **Visit** (optional, first): play 1 card from your hand onto a rival's Notice Board and take its power at once (see The Visit).
 - 2 **Take 1 action** (required): Draw, Build, Grow, Harvest or Deliver (see The Five Actions).
 - 3 **Worker** (optional, after your action): discard 1 Worker to take the plain action of its colour (see Workers).
- You cannot visit after your action: the power you buy can set up your action.
 - You must take an action if you can. If none is possible, pass it (you may still use a Worker).
 - Finish resolving each step, including everything its abilities trigger, before starting the next.
 - There is no hand limit.**

The Visit

- 1 Choose a Notice Board in a rival's farm whose power you can use right now, at least in part.
- 2 Place **1 card from your hand**, face up, on that board's stack. Any card of any crop may pay.
- 3 Take that board's power immediately, as if it were printed for you.
- 4 The card stays on that board until its owner harvests the board. When they do, it goes into their barn.

YOUR JUNK IS THEIR TREASURE

Pin your least useful card. You get their power now; at their next harvest the card rides into their barn, often as the odd crop the island wants from them.

NEVER YOUR OWN BOARD

You may never visit your own Notice Board - either of them at two players. Everything a Notice Board earns you, it earns from other people.

- At most one visit per turn**, so no board is used twice in a turn.
- You may not visit a board whose power you could not carry out at all right now.** If you could carry out part of it, you may visit and do as much as you can. The card you pin has already left your hand, so it cannot be used for the power.
- A coin can never pay for a visit.
- Visiting takes nothing from the board's owner: they do not act, and they do not have to agree.

The Notice Board Powers

Board	Its power, and how it works
 O3 Orchard	<i>Draw 4.</i> Draw 4 cards, one at a time, each from any deck in play.
 D3 Dairy	<i>Build, spending cards of any crops. You may then Grow that building with a deck card of any crop.</i> Build a card from your hand, paying its full number of cost cards with cards of any crops (coins also pay, see The Village Store). Then you may GROW the building you just built, paying its activation cost with the top card of any deck in play, whatever its crop. If you built a Power or End-game card there is nothing to grow.
 A3 Apiary	<i>Grow a building using the top card of any deck.</i> Choose one of your buildings that is not full and has an activation cost. Take the top card of any deck in play and put it on that building's stack as its activation payment, whatever its crop. Resolve the ability.
 W3 Wheat	<i>Harvest one of your buildings, then put 1 card from your hand into your barn.</i> Harvest one of your full buildings, or one of your Notice Boards holding 3 or more cards, exactly as the Harvest action. Then put 1 other card from your hand into your barn (the card you pinned has already left your hand). If you have nothing you may harvest, you may still visit just for the barn card.
 V3 Vegetable	<i>Deliver. If you cannot, put 2 cards from your hand into your barn.</i> If you can make a delivery to the island, you must (see Delivering to the Island); you may not fly a balloon instead. Only if you cannot deliver to the island , choose one: fly a balloon (see The Aerodrome and Balloons), or put 2 other cards from your hand into your barn (the card you pinned has already left your hand): as many as you can, up to 2.

YOUR TURN

Example: One visit, two ways

A round later, on Cal's turn. Ana has harvested her O3; Ben's W3 holds 3 cards.

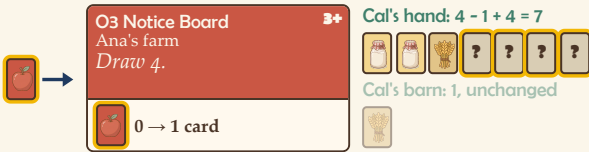

Before
Cal's turn

placeholder art

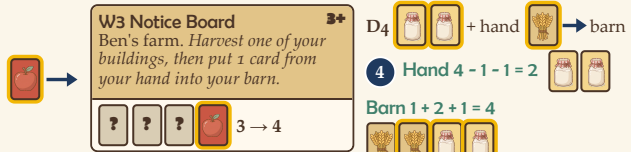

6 Cal farms Dairy. His own D3 Notice Board is never a choice, and he may visit only one board a turn.

2 Way 1: onto Ana's O3 Orchard Notice Board

5 Ana harvests O3 later, so the orchard card goes into Ana's barn.

3 Way 2: onto Ben's W3 Wheat Notice Board

5 Ben harvests W3 later, so the orchard card goes into Ben's barn.

- 1 **The same card.** Cal pins his orchard card, the one he has no use for. What it buys depends on whose board it goes on.
- 2 **Way 1, Ana's O3 (0 → 1 card):** Draw 4, from any decks in play. Hand $4 - 1 + 4 = 7$; his barn stays at 1.
- 3 **Way 2, Ben's W3 (3 → 4 cards):** Cal harvests D4, which is full: 2 dairy cards into his barn. Then his wheat card goes from hand to barn.
- 4 Hand $4 - 1 - 1 = 2$ (2 dairy); barn $1 + 2 + 1 = 4$ (2 wheat, 2 dairy). The Visit came first, so Cal can now take Deliver as his action, if an island card asks for wheat and dairy.
- 5 **Either way, the card stays on that rival's Notice Board.** When Ana (or Ben) harvests that board, the orchard card goes into their barn, never Cal's.
- 6 **Not allowed:** harvesting D8 with Ben's power (1 of 2 cards, not full), visiting his own D3, or visiting both boards in one turn.

The Five Actions

Draw

Build

Grow

Harvest

Deliver

On your turn you take exactly one of these five actions. Each is described below.

1. Draw

Draw 2 cards and keep both. Draw them one at a time; each may come from any deck in play, the same deck or two different decks. You may draw from any deck in play, including the neutral deck and your rivals' decks. (Empty decks: see Small Rulings.)

2. Build

Choose a card in your hand and put it into your farm, paying its build cost with other cards from your hand (see Reading a Card). A crop icon needs a card of that crop; a basket icon takes any crop. Spent cards go to their own crops' discard piles.

- You may build a card of any crop, not only your own.
- Coins are wild for building:** each coin you spend pays one cost icon of any kind, including a crop icon, and returns to the Store's supply.
- Power and End-game cards cost 2 cards of their own crop, or 2 coins, or 1 of each.
- A new building arrives with an empty stack.

3. Grow

Activate one of your own buildings that is not full (each building at most once per turn, see Small Rulings).

- Pay 1 card from your hand that matches its activation cost (any crop, if the cost is a basket) onto its stack. Then resolve its ability.
- If that card fills the building, the ability still resolves, and the building is then full (see Buildings).
- Or pay 1 coin instead of the card.** A coin places nothing: the building's stack does not grow, and it does not become full. **A coin may grow a full building.** This is the only way to activate a full building.
- A coin Grow still fires "when activated" abilities, but not abilities that trigger on placing a card.
- You can never grow a Notice Board, a Barn, a Farmstead, a Power card or an End-game card.

YOUR TURN

4. Harvest

Choose one of your own full buildings, or one of your Notice Boards holding 3 or more cards, and move its whole stack into your barn.

- The building stays in your farm, empty and ready to take cards again.
- Harvesting scores no points by itself. The cards are the prize.
- A building that is not full cannot be harvested, however many cards it holds, unless a card's own text says so. (Cards such as W8, W11, W12 and W13 print their own exceptions.)

5. Deliver

Choose one:

- Deliver to the island:** pay one island card's two crates from your barn and take a receipt (see Delivering to the Island); or
- Fly a balloon:** pay 1 card of any crop from your barn and take a balloon (see The Aerodrome and Balloons).

After either, you may trade barn cards at the Village Store (see The Village Store).

Buildings

- Only the owner activates a building.** You never need to read a neighbour's building text to take your turn.
- Full and clogged.** When a building's stack reaches its threshold it is full. A full building:
 - takes no more cards, from anyone, by any route;
 - cannot be grown with a card, so its "when activated" ability cannot fire, **except by a coin Grow** (see Grow). Its **HARVEST:** line still happens when you harvest it;
 - stays that way until its owner harvests it.

- Cards land on a building in three ways:** a **GROW** (your building, matching card, you take the ability), a **SOW** (a card effect, any card, nothing fires), or a **VISIT** (a rival's Notice Board, any card, you take its power).
- Notice Boards never clog** (see The Notice Board).

CHEAP AND PATIENT, OR DEAR AND HUNGRY

Cheap buildings have high thresholds and soak up cards for a long time before they clog. Expensive buildings have low thresholds: they fire at once, but you will be harvesting them constantly.

Example: A typical turn

3 players: Ana farms Orchard, Ben Wheat, Cal Dairy. Neutral deck: Vegetable.

Cards: placeholder art	Before Ben's turn	1 Visit: Ana's O3	2 Action: Grow W4	3 Worker: Harvest
O3 Notice Board 3+ Draw 4. Ana's farm	= 2	= 3	= 3	= 3
Ben's hand	= 4	= 7	= 7	= 6
W4 Wheat Field 2 Draw 1. HARVEST: Put 1 card from your hand into your barn.	1 of 2	1 of 2	2 of 2: full	empty: 0 of 2
Ben's barn	= 1	= 1	= 1	4 = 4
Ben's Workers	yellow: Harvest	yellow: Harvest	yellow: Harvest	yellow: Harvest → to the box = 0

- Visit.** Ben pins his vegetable card to Ana's O3 Notice Board (2 → 3 cards) and takes its power, *Draw 4:* from the Wheat, Wheat, Dairy and Orchard decks. Hand 4 - 1 + 4 = 7.
- Action: Grow.** Ben pays 1 wheat card onto W4 Wheat Field: 2 of 2, so it is full. Its ability still fires: *Draw 1,* from the Vegetable deck. Hand 7 - 1 + 1 = 7.
- Worker: Harvest.** Ben discards his yellow Worker to the box and harvests W4: both wheat cards go into his barn. W4's HARVEST: line puts his vegetable card from his hand into his barn.
- Result.** Hand 6; barn 1 + 2 + 1 = 4 (1 orchard, 2 wheat, 1 vegetable); W4 is empty, ready to grow again. Ben ends his turn holding all 6 cards.

THE ISLAND

Delivering to the Island

Paying for a delivery

- 1 Choose any island card with at least one free delivery space. Any island card is legal on any turn.
- 2 Pay its **two crates** from your barn. Each crate asks for **2 cards of the crop on its demand token**. A **cornucopia** crate asks for **any 2 cards**, of any crops, mixed or matching. A **face-down** token counts as a cornucopia.
- 3 Paid cards go to their own crops' discard piles.

BARN ONLY

You can never deliver from your hand. Every card you deliver was harvested first - from your own buildings, or from the cards your neighbours pinned to your board.

The wild substitution

When you pay the island, any single card it asks for may instead be paid with **2 cards of any crops**. **Island deliveries only**: never a balloon flight, a build or anything else.

Paying one crate	Cards
Its own crop	2 of that crop
One short	1 of that crop + 2 of any crops
None of it	4 of any crops
A cornucopia or face-down crate	any 2 cards

A whole island card	As asked	1 sub.	2	3	All 4
Cards from your barn	4	5	6	7	8

A cornucopia crate never needs a substitution: any 2 cards already pay it.

EVERY ISLAND CARD IS THE SAME

Two crates, and a choice of 6 VP, or 3 VP and a Worker. The only questions are which crops, and whether you get there first.

Choosing your space

Take **either** free space on the island card:

- the **6 VP** space: take its 6 VP receipt; or
- the **3 VP** space: take its 3 VP receipt **and the Worker standing on it** (see Workers).

The first player to deliver to an island card may take the 3 VP and the Worker and leave the 6 VP for somebody else.

Your receipt

Put the receipt in an empty slot of your Farmstead. When you place your sixth, the end is triggered (see End of the Game). A card that gives you two receipts from one delivery (V14) fills two slots, and both count.

The closing draw

If your delivery fills the **last** free space on an island card (whichever space that is), draw **1 card for each demand token on that card**, from the deck of that token's crop. No choice.

- A **cornucopia** draws 1 card from any deck in play, your choice.
- A **face-down** token draws from the deck of the crop printed on its other side.
- If a crop's deck and discard pile are both empty, that token draws nothing.
- The closing draw is not a Draw action.

The order a delivery resolves in

Pay the crates → take the receipt (and Worker) → closing draw, if the card is now full → any card text that triggers on delivering → check for your sixth receipt → the Village Store.

Demand tokens can change

Some Vegetable cards **SWAP** two demand tokens, or turn one **FACE DOWN**. Either may only touch a token on an island card that still has a free space.

THE ISLAND

Example: A delivery

The same two-player game as the island example. The coin supply started at 10.

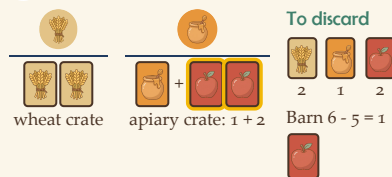

1 Earlier: Ben's space choice

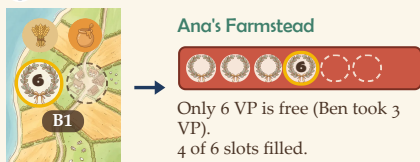

2 Before Ana's turn

3 Pay, with a wild substitution

4 Choose the space

5 Closing draw

6 Village Store

- Earlier, Ben paid B1's wheat and apiary crates and chose the 3 VP space: its receipt and the yellow Worker. B1 was not full, so no closing draw. He traded 2 barn cards for 2 coins.
- Before Ana's turn her barn holds 6 cards (2 wheat, 1 apiary, 3 orchard) and her Farmstead 3 receipts. Her action: Deliver to B1.
- Pay. Wheat crate: 2 wheat. Apiary crate: 1 apiary + 2 orchard, the wild substitution for her missing apiary card. The 5 cards go to their own discard piles. Barn 6 - 5 = 1.
- Choose the space. Only the 6 VP space is free, so Ana puts its receipt in her Farmstead: 4 of 6.
- Closing draw. Her delivery filled B1's last space, so she draws 1 card per demand token, from the Wheat deck, 1 from the Apiary deck. Then the end check: 4 receipts, not 6, so the game goes on.
- Village Store. Ana trades her last barn card (orchard) for 1 coin: supply 8 → 7, barn 0.

The Village Store

The supply

5 coins per player, shared, in the centre. There is no limit to how many coins one player may hold. Everyone may see how many coins each player holds.

Earning coins: the exchange

Whenever you make a delivery or fly a balloon (see The Aerodrome and Balloons), after it has resolved you may trade cards **from your barn** at the Store, **one at a time**:

- Put 1 card from your barn onto its crop's discard pile and take 1 coin from the supply.
- Trade another card, or stop.

- Only barn cards, never hand cards.
- The crates are paid first, so you can never trade the cards the delivery needs.
- If the supply runs out, you stop. An empty supply pays nothing.
- Any delivery lets you trade: your action, a Notice Board power, a Worker or a card effect.

Spending coins

A coin is a wild card for exactly two things: **Build** (each coin pays one cost icon of any kind; see Build) and **Grow** (1 coin pays the activation cost of any of your buildings, even a full one, and places nothing; see Grow). Spent coins go back to the supply.

WHAT COINS NEVER DO

A coin can never pay for a visit, a Harvest or a delivery, and never counts as a card. Coins score nothing and do not count for the tie-break.

THE ISLAND

The Aerodrome and Balloons

Each balloon gives the plain action of its colour: ■ red Draw, □ white Build, ■ orange Grow, ■ yellow Harvest (see The Five Crops).

Flying a balloon

Flying a balloon is a Deliver (as your action, or whenever you are allowed to Deliver, except that the Vegetable Notice Board requires an island delivery when one is possible):

- 1 Pay **1 card of any crop** from your barn to its discard pile.
- 2 Take a balloon **from the centre or from a rival's Aerodrome**, never one already at your own Aerodrome, and put it at your Aerodrome. **You may only take a balloon whose plain action you can take right now.**
- 3 Take **the plain action of its colour** (never a Notice Board power).
- 4 Then you may trade at the Village Store.

2 CENTRE OF THE TABLE

- 1 Pay 1 barn card of any crop, as a Deliver (usually your action).
- 2 Take a balloon from the centre or from a rival's Aerodrome, never your own, and put it at your Aerodrome: only a balloon whose action you can take.
- 3 Take its colour's plain action.
There is no green balloon: a flight is itself a Deliver.

What a flight is and is not

- A flight **is a Deliver** for card text ("when you Deliver", "move a Balloon") and for the Village Store.
- A flight is **not a delivery to the island**: it pays no receipt, triggers no closing draw, and **never counts towards the end of the game.**
- A balloon sitting at your Aerodrome does nothing by itself; only moving one gives its action. Some cards score balloons at your Aerodrome (V19).

Workers

Workers are the wooden meeples on the island, one standing on each island card's 3 VP space at the start of the game.

Each Worker gives the plain action of its colour: ■ red Draw, □ white Build, ■ orange Grow, ■ yellow Harvest, ■ green Deliver (see The Five Crops).

- Getting Workers:** take the Worker when you take a 3 VP receipt (see Delivering to the Island).
- Using Workers:** after your action, you may discard **1** Worker to take the plain action of its colour. It then leaves the game (return it to the box).

- One per turn.** It is always the plain action, never a Notice Board power.
- You may not use a Worker whose action you cannot take.
- You may use a Worker on a turn where you had to pass your action.
- A Worker's Grow places its card as normal and can fill the building.
- A green Worker's Deliver may be an island delivery or a balloon flight (only a balloon whose action you can take), and lets you trade at the Store.
- Workers you hold are public. Unused Workers score nothing.

END OF THE GAME

The End

- The end is triggered the moment a player places their sixth receipt in their Farmstead.
- Finish the current round, so that every player has had the same number of turns: play continues until the player sitting to the right of the first player (the player with the Setup aid) has taken their turn. Then the game ends. If that player triggered it, the game ends at the end of their turn.
- The triggering player finishes their whole turn, including any Store exchange and Worker.
- Balloon flights never count towards the end.
- A receipt beyond the sixth (for example from V14) is placed beside the Farmstead and scores; the end is triggered as normal.

Scoring

Add up three things, all on the table in front of you:

- 1 **Receipts:** the VP printed on your receipts (6 or 3 each).
- 2 **Printed VP** on every card you have built: every card in your farm except your starters, Power cards included.
- 3 **End-game scoring:** each End-game card you have built, scored as it says, and your Barn's own-crop scorer.

Coins score nothing. Workers score nothing. Cards in your hand and barn score nothing unless a card says so.

TIE-BREAK

The tied player with the most cards in hand and barn combined wins. If still tied, they share the victory. Coins do not count.

Example: Scoring Ana's farm

Ana (Orchard) placed her sixth receipt; the round finished, and the game is scored.

O2 Farmstead (6 receipts) **O1 Barn** (Game end: 1 VP for each Orchard card you have built.) **O3** (3+) **V3** (3+)

Starters: never built, 0 VP

Built cards (7) **O4** The Apple Grove GROVE **O6** The Cherry Grove GROVE **O8** The Heritage Grove GROVE **O9** The Fruit Stand Tier 2 **W11** The Bakehouse Tier 2 **O16** The Fruit Store Power **O20** Crop Diversity End-game

Cards: placeholder art

5 1 coin 1 Worker score nothing

Source	Working	VP
1 Receipts	6 + 6 + 3 + 6 + 3 + 6	30
2 Printed VP on built cards	1 + 1 + 1 + 2 + 2 + 1 + 0	8
3 O20 Crop Diversity	3 GROVES (O4, O6, O8) × 2 VP	6
4 O1 Barn scorer	6 Orchard cards built (not W11)	6
5 Coin, Worker	score nothing	0
Total	30 + 8 + 6 + 6	50

- 1 **Receipts:** the VP printed on each of Ana's six receipts.
- 2 **Printed VP:** every card she built scores its wreath, Power and End-game included. Starters (O1, O2, O3, V3) are never built: 0.
- 3 **O20 Crop Diversity** (Game end: 2 VP for each GROVE you have built): O4, O6 and O8 are GROVES, so $3 \times 2 = 6$.
- 4 **O1 Barn:** 1 VP for each Orchard card she built: O4, O6, O8, O9, O16 and O20. W11 is a Wheat card, so it does not count.
- 5 **Coins and Workers score nothing.** For a tie, see Tie-break.

SMALL RULINGS

- **A building may be activated at most once per turn.** You cannot GROW the same building twice in one turn, whether with a card, a coin, a Worker or a Notice Board power.
- **"Whenever" abilities fire every time.** A "whenever" ability fires each time its trigger happens, even several times in one turn. Each building built or harvested, and each card placed, is its own trigger: an action that builds 2 buildings triggers "Whenever you Build" twice. For example, W16 The Granary draws once for each building you harvest, and D16 The Ledger draws once for each building you build.
- **Empty decks.** When you must draw from a crop's deck and it is empty, shuffle that crop's discard pile to make its new deck. If both are empty, you cannot draw from that crop; if the effect lets you choose a deck, choose another deck in play.
- **Discards.** Cards spent, paid, traded or discarded always go face up to their own crop's discard pile, whatever farm they came from.
- **Drawing only from decks in play.** "Any deck" always means any deck in play. "Draw 2" and every "Draw N" draws one card at a time, each from any deck in play.

SMALL RULINGS

- **"You may"** in an ability is optional. An ability without it is not. If an ability cannot be carried out in full, carry out as much of it as you can.
- **A card sown onto a neighbour's building is not a visit.** It buys nothing and pays nobody.
- **A card taken off a stack by a card effect is not harvested,** so harvest abilities do not fire.
- **Built** means paid for and put into your farm (see Your Farm). A demolished card stops counting as built.
- **Buildings in card text.** "Your buildings" are the cards in your farm that have a threshold, including your Notice Board(s); never a Power card, End-game card, Barn or Farmstead. **SOW** and **GROW** never reach a Notice Board, and a Notice Board is only ever harvested when it holds 3 or more cards, whatever a card says.

GLOSSARY

Action colour - The colour that names an action on balloons, Workers and aids: red Draw, white Build, orange Grow, yellow Harvest, green Deliver. *See The Five Crops.*

ACTIVATE - A building's ability fires. Only the owner activates a building. *See The Keywords.*

Aerodrome - The card beside your farm where balloons you fly come to rest. *See The Aerodrome and Balloons.*

Barn - Your starter that holds your harvested cards and prints your own-crop scorer. Your barn cards are public. *See Your Farm.*

Build at a discount of N - Build, paying N fewer cost icons (you choose which).

Closing draw - The draw for filling an island card's last space. *See Delivering to the Island.*

Coin - A Village Store coin: a wild card for Build and Grow. *See The Village Store.*

Cornucopia - A wild demand token: its crate takes any 2 cards. *See Delivering to the Island.*

Crate - One of the two demands on an island card: 2 cards of its token's crop. *See Delivering to the Island.*

Crop colour - The colour of a crop's cards. *See The Five Crops.*

Deck card - A card from a crop deck, not a starter. On the Dairy Notice Board, the deck card is the top card of any deck in play. *See The Notice Board Powers.*

Deck in play - One of the 3 / 4 / 5 crop decks on the table. *See Setup.*

Demolish - Remove a built card from your farm, as a card says. *See Small Rulings.*

Deliver - An island delivery or a balloon flight. *See Deliver.*

Demand token - The token on a crate naming the crop it wants. *See Delivering to the Island.*

DEPOT - Vegetable's Tier 1 buildings, V4 to V8.

FACE DOWN - A demand token turned over by a card: like a cornucopia its crate takes any 2 cards, but it draws its printed crop in the closing draw. *See Delivering to the Island.*

Farmstead - Your starter with six receipt slots. *See Your Farm.*

FIELD - Wheat's Tier 1 buildings, W4 to W8.

First player - Chosen at random; keeps the Setup aid all game. *See Setup.*

Full - A building whose stack has reached its threshold. *See Buildings.*

GROVE - Orchard's Tier 1 buildings, O4 to O8.

GROW - Activate your own building by paying a matching card (or a coin). *See The Keywords.*

Harvest - Move a full building's stack (or a Notice Board's 3+ stack) into your barn. *See Harvest.*

HIVE - Apiary's Tier 1 buildings, A4 to A8. A13 The Queen's Hive is not a HIVE.

Neighbour - Any other player. *See The Three Lives of a Card.*

Notice Board - Your starter that prints your crop's power; rivals visit it. *See The Visit.*

Plain action - One of the five actions exactly as The Five Actions describes, never a Notice Board power.

Receipt - A 6 VP or 3 VP token taken for an island delivery, kept in your Farmstead. *See Delivering to the Island.*

Round - One turn for every player, beginning with the first player. *See End of the Game.*

SHED - Dairy's Tier 1 buildings, D4 to D8.

SOW - Place a card on a building that is not full, without activating it. *See The Keywords.*

Stack - The cards on a building. *See Buildings.*

SWAP - Exchange two demand tokens on island cards that still have a free space.

Threshold - The number of cards that fills a building; 3+ on a Notice Board is a minimum. *See Reading a Card.*

VISIT - Pay a hand card onto a rival's Notice Board for its power. *See The Visit.*

Village Store - The shared coin supply and the exchange. *See The Village Store.*

Worker - One of the wooden figures on the island's 3 VP spaces; take it with a 3 VP receipt and discard it after your action for the plain action of its colour. *See Workers.*

QUICK REFERENCE

Your turn

- 1 **Visit** (optional): 1 hand card onto a rival's Notice Board; take its power now.
- 2 **1 Action:** Draw, Build, Grow, Harvest or Deliver.
- 3 **Worker** (optional): discard 1 for its colour's plain action. One per turn. Red Draw, white Build, orange Grow, yellow Harvest, green Deliver.

A building may be activated at most once per turn; "whenever" abilities fire every time.

Actions

- **Draw** - 2 cards, one at a time, from any decks in play. Keep both.
- **Build** - put a hand card into your farm; pay its cost icons from your hand. Coins are wild.
- **Grow** - pay 1 matching card onto your building, or 1 coin (a coin places nothing); take its ability. A coin can grow a full building.
- **Harvest** - move a full building's stack, or a Notice Board's 3+ stack, into your barn.
- **Deliver** - island (2 crates from your barn) or balloon (1 barn card). Then the Store.

The Visit

- Never your own board. One visit per turn.
- Only a board whose power you can use now, at least in part. Do as much as you can.
- The card stays; its owner harvests it.

Notice Board powers

-  **Orchard** (Draw): Draw 4.
-  **Dairy** (Build): Build, spending cards of any crops. You may then Grow that building with a deck card of any crop. (The top card of any deck pays.)
-  **Apiary** (Grow): Grow a building using the top card of any deck.
-  **Wheat** (Harvest): Harvest one of your buildings, then put 1 card from your hand into your barn. (Nothing full? You may still visit for the barn card.)
-  **Vegetable** (Deliver): Deliver. If you cannot, put 2 cards from your hand into your barn. (Island delivery if you can; if not, fly a balloon or take the 2 cards.)

Balloons

Pay 1 barn card of any crop; take a balloon from the centre or a rival's Aerodrome, only one whose action you can take; take its action: red Draw, white Build, orange Grow, yellow Harvest. A flight is a Deliver; it never counts for the end.

Village Store

After any delivery or flight: trade barn cards one at a time for 1 coin each. Spend a coin as a wild card to Build or Grow, even on a full building. Never for a visit, Harvest or delivery. Coins score nothing.

The island

- Any island card with a free space. Each crate: 2 cards of its crop (cornucopia: any 2 cards).
- Wild substitution: any 1 card asked for = 2 cards of any crops. Island only.
- Take 6 VP, or 3 VP + its Worker.
- Fill the last space: draw 1 card per demand token from that crop's deck (cornucopia: any deck).

End and scoring

- Sixth receipt: finish the round (it ends with the player to the right of the Setup aid), then score. Extra receipts score.
- Receipts + printed VP + End-game cards (and your Barn).
- Coins score nothing. Tie: most cards in hand and barn, then share.
